99000123	Keane, Bernadette	HQ	12/9/1999	Closed	12/9/1999	None	RC	Small		
Ad Hoc FLSA Query	HQ Payroll needs a one-time query report to show all active employees in Headquarters who have overtime rates higher than the cap of \$26.64. Request they be sorted by last name alphabetically, and also show SSN, grade, step FLSA code and OT rate.		Create, or modify, a query to produce the requested results.							
99000122	Wenger, Teresa	MSFC	12/15/1999	Closed	1/7/2000	None	RC	Small		
Change Default Parameter for Report 303	The default parameter date for CPO non-consolidated report CA00303 and MSFC report NA00303 should be changed to produce correct output with reduced chance for incorrect submittal.		Following Leave Year End processing, the parameter date for CA00303 (loaded for all Centers) and MSFC's NA00303 should be the new Leave Year Ending date - 20000101. This change needs to be after January 5th, 2000.

Release 7.5 for CNPPS		The software will be installed to the CNPPS Production Database on 12/20 per the VDD, and Change Board approval. There are two items that should be documented, however.					1) The YearEnd database will not receive the full 7.5 installation, as the Production, Test and Development databases do. It will receive only the NAB418 module, necessary for processing 1999 yearend. (IFMP test database implementation will be per their request.)			
		The UOG Appendix C is in accordance with Release 7.5.					2) The note in the VDD section 8.0 regarding the NECAPP1 JCL will not be implemented due to the 818 portions being removed from NECAPP1 per CNPPS 1620 99000114.			
99000120	Epperson, Cindy	SSC	12/3/1999	Closed	12/17/1999	None	RC	Small		
Quarterly Stennis Leave Totals Spreadsheet		Per the referenced 1620 on Leave Totals created for the Agency for JSC, Stennis requests their previous Leave queries be slightly modified to pull identical data (more accurate) and provide to them on a quarterly basis.					Modify queries SSCHISTO and SSCHIST2 to modify the data extracts, rerun the ref. 99000118 queries for Stennis only, sorted/totalled by ORG.			
		Also, the Leave information provided to JSC (annual totals only) is requested for Stennis, by Organization total. This will give Stennis the identical information provided to JSC/NASA Headquarters, but by Organization as it is used by Stennis.					Create a routine to give this data to SSC in the future, at the end of each Quarter, for that year's QTD information - in Excel spreadsheet format.

FYE Report 420 Data to Spreadsheet	In order to more easily and accurately complete the Fiscal Year Imputed Cost for Pensions for each Center, we would like to have the NPPS report 420 for each Center (created at FYE) transferred to a spreadsheet for our use.		<p>A seperate CA00420 will be run for each center annually at Fiscal Year End. For FYE '99, these reports already exist and will be used. Each dataset will contain the following columns and a seperate excel spreadsheet will be created with CSRS and FERS information: Ret CD, Adj Basic Pay, Retirement Empl, Retirement Empr. After completing the seperate spreadsheets, they will be combined into a single file and provided to Mike Clemons where he will input the Cost Factor, calculate the Service Cost and Imputed Cost.</p> <p>This will become a part of normal FYE processing in the future.</p>							
99000118	Braymer, Susan	JSC	11/19/1999	Closed	11/23/1999	None	RC	Small		
Agency Leave Totals Spreadsheets	JSC personnel saw NPPS query results that were produced for Stennis via 1620 99000109 and would like the same information for all 10 Centers. The request for this data has been approved through Headquarters, via Deputy CFOs. The data needed for each Center, is the year's balance/total for 1994 to present for the following fields: Overtime, Sick Used, CT Earned, CT Used, CT Lost, Credit Earned, Credit Used, Credit Forfeited, Annual Used, Restored Leave Balance, Donated and Donated Used.		Create two Excel files - one containing yearly totals of these fields for each Code M Center, and one for all other Centers - each Center should be a separate spreadsheet within the file.

99000117	Wenger, Teresa	MSFC	11/22/1999	Closed	11/23/1999	None	RC	Small		
Make Operable Leave & Earning Statement Code Change			An erroneous date was noticed on random L&E statements, during final verification tests at Langley. A date was appearing in the Extended Comp Time column on the Use/Lose line, despite an employee having no Extended Comp Time hours. The date should be blank.				It has been determined by SESAAS that a field #EXT-CT-EXP-NXT-PP-DATE was not being reset correctly in the software. In order to process Production payroll with this new 7.4 software on November 23rd, a Make Operable software change is necessary.			
							Modify module NAB555 to reset the U/L field. Add after line 7905: 7900 RESET #EX-CT-BALANCE #EX-CT-EXP-NXT-PP 7905 #EXT-CT-FILE-DATE 7906 #EXT-CT-EXP-NXT-PP-DATE			
99000116	Wenger, Teresa	MSFC	11/19/1999	Approved	11/30/1999	None	DR	Large		
Dryden Oct-Dec 1995 YTD Data			Per referenced CNPPS 1620, Dryden data was recently recovered from Ames that had not been included in the original Payroll Consolidation effort. In working with this data, it was realized that the YTD leave fields for pay periods 22 through 26 in 1995 were not accumulating with the PP21. This was due to PP21 being processed at Ames, PP22 forward being processed at Dryden and the history files being disconnected. The "dollar" YTD accumulating fields are accurate due to the YTD view on the PAY-PHYSICAL file that was correctly transferred to Dryden. This was also evident due to 1995 W2 processing by Dryden.				The CPO Technical Team will write programs to view/modify/verify all Center "2400" affected year-to-date fields for 1995 PP's 22 through 26. The 1995 PP's 21 and 01 will be used in the verification surrounding the accumulating to be performed.

Print of TSP Letters			Currently MSFC's Job NE00004 does not print the TSP Letters it produces, correctly. They are printing to the Xerox, Class D printer in Landscape format. They should be printed Portrait. This has been an ongoing problem - but the output is more critical now than in the past and it must be fixed.				Modify the JCL to print the TSP letters (datasets 254 A & B) in a portrait format. This has been resolved for printing portrait to Xerox Class D - however the better option (User requested) is to print to a Personnel office Laser printer - U0167.			
99000114	Wenger, Teresa	MSFC	11/8/1999	Closed	11/9/1999	None	RC	Small		
Remove RPT818 Step from NECAPP1			The creation of Fund Source 1 data (818 report) and transmission to CAPPs has been determined as unnecessary. To clean up the processes and avoid unnecessary future changes to the NECAPP1 job creating this, the step running NAB818 and the progressive steps to write to a CAPPs dataset should be eliminated.				Modify the JCL for NECAPP1 to remove all associated steps/lines running the NAB818 and NAB819, and the ALLOCation steps and IEBGENER to a CAPPs dataset. The BJS RPT dataset should be modified to remove the 818 listed as a report - this needs to also be done manually online through NPPS to delete the information. The BJS JOB dataset should be modified to remove the invoking of Parameter program for the 818. All should be loaded to the Production databases.			
							The UOG Appendix C should be modified to reflect the removal of the 818 step from NECAPP1.

Add Backup to CAEE002			Due to the NPPS Software Release 7.4.1 changes to CAEE002, which incorporates a new beginning step of NAB6142 to run bond deletions, and our greater understanding of the CAEE002 processing - we have decided to place a backup at the start of CAEE002, to capture the three files that are greatly modified by it. This job will now (due to the 7.4.1 changes) be run in the evenings, immediately prior to CA00006, so locking these files for a backup will not be a User issue.				To provide greater security in case of problems, and to ensure data integrity, add a step to the start of CAEE002 to backup files 220, 227 and 240. We will call the backup GDG AGAOH.NPPSPP.NAEE02 and keep 3 generations of it. The DBA will create members for us to use - a backup member to refer to in the JCL, and a restore member to allow us to restore these 3 files in case of emergency.			
							On typical Wednesdays of Payweek, we will Schedule and Submit the CAEE002. Upon its successful completion, we'll then Schedule CA00006 and CA00009 and then Submit both. The Sequence Number of the CAEE002 should be modified to ensure it is lower than the CA00006 and CA00009, for future times of scheduling all 3 jobs at once.			
99000112	Deherrera, Beverly	JSC	11/4/1999	Closed	11/5/1999	None	RC	Small		
JSC 311 Distribution			Please modify Report 311, Religious Comp Time Report, to print 1 copy rather than 3 to JSC each time it runs.				Modify the BJS default from 3 to 1 copies.

Personnel Mature Reports for CPO	Modify the NE00002 for DFRC: Email directed to David Percival and Deborah Gonzalez, only. Print to U0535. Modify the NE00002 for LARC: Additional email directed to Julia Lee. Modify the NE00002 for ARC: Email directed to Kathy Wyckoff and Sabrina Walker, only. Modify the NE00002 for MSFC: Email directed to Julia Lee and Joyce Griffin, only.		Modify the JCL accordingly and reload to Production.							
99000110	Barkley, Lynda	MSFC	11/2/1999	Closed	11/5/1999	None	RC	Small		
ADOSS Server Name	The ADOSS server is soon changing permanently to a different name. The JCL for CPO and Center jobs refers to it as a different name. This new name may be used now, the current name will be obsolete within a few weeks. We must modify our JCL to ensure we have the correct server name in order to FTP data to ADOSS.		Modify all JCL with FTP steps in it, to reflect the new ADOSS server name.  Modify the APC904 tool which loads JCL to NPPS, as it was substituting dataset names based on a string of "ADOSS". Due to that string being in the new server name, the tool must now be changed to look for a larger string of "ADOSS" , in order to leave the server name as it should be.

YTD OT & Leave Queries - 1993 to Present	As with the referenced 1620, SSC has had an immediate request for additional annual leave information. Year-to-date totals are needed for the following fields for each year of 1993, 1994, 1995, 1996, 1997, 1998 and 1999 to date: Overtime, Comp Time Earned, Comp Time Used, Comp Time Lost, Credit Hours Earned, Credit Hours Used, Annual Leave Taken, Annual Leave Restored, Sick Leave Taken, Donated Leave Used.		Ensure that YTD totals for Overtime are at Pay Year End, and YTD totals for all Leave fields are at Leave Year End - for each of the years in question. This is a change from first (referenced) request. Provide the results in spreadsheet format.

Dual Print Daily EE Report to Centers	Per a recent Employee Express telecon, the issue was raised again concerning the distribution of the daily Employee Express transaction reports. There are distinctive needs at Centers for the information in this report. It should be offered once more to the Centers - but reminding them of its consolidation.		Offer the Centers the EEB1 report from the daily CAEE014 job. Dual print to those requesting it, within this job, by adding separate print steps. The full report will be sent to each.

Modified SF50 Xerox Form		Due to the referenced NPPS 1620, the SF50 Xerox form has been modified to improve some of its blocks which were running into the data printed on the form.					Once MSFC Personnel approves the modified form and confirms all SF50 print is still correct, this form should be delivered to all Centers, via diskette, with instructions to replace the old form. This will be of the same Xerox form name.			
99000104	Percival, David	MSFC	10/8/1999	Closed	2/29/2000	None	RC	Small		
Agency SSN BJS Query		Quite often, CPO is required to investigate NASA employees' payroll information without knowing exactly where the employee was stationed, when. This leads to time-consuming random checks for the SSN through online screens checking various pay periods. CPO is able to call their technical support team for a query to provide this information when needed. However, an efficient solution would be a query tool available to CPO for these details. A query available through BJS, available only to NASA users, would be very effective.					Modify the query SSNQUERY to ask for input of SSN, then display the SSN, Center, PPE date, Name and Duty Status.  Place this query in the NASA BJS - CA00SSN. Build each section - JOB/RPT/JCL - with the JCL delivering this query output to printer U2615 in the CPO. Update the CPO Unique section of the UOG Appendix C.  Approval for this has been received from CPO Management.

JSC Archival System	JSC is implementing a new archival system and need several payroll reports delivered there. They will be sent to the destination of U3418 and from there will be placed in the archival storage.		<p>Modify the JCL for all reports in the JSC NABWAJ5 (additional ones TBD) to transmit the reports to:</p> <p>CLASS=B, DEST=U3418, Writer=report number.</p> <p>Testing will be done closely between JSC and CPO technicals to confirm successful transmissions.</p>							
99000102	Wenger, Teresa	MSFC	10/8/1999	Closed	11/16/1999	None	RC	Small		
W2 and Yearend Emergency Address Letters	There are two critical reasons for CPO to ensure that all NASA employees' addresses are correct in NPPS by December 18, 1999. The first is for mailing the 1999 W2s, the second is for an emergency situation in which paychecks may need to be home-mailed if EFT does not work the first week of January 2000. The CPO technical team used form letters last year for a few centers - they are offered again this year to all ten. For those wanting these letters, they will be created and delivered by November 12, 1999.		<p>A non-consolidated CPO Unique job exists to run these letters - CAW2LTR. The program used is AGPMAIL. A unique map is referenced/used in the code for each Center participating. The map for the letter contains specific center information such as where/how to return address changes, contact personnel, whether the center encourages the use of Employee Express, etc. The map names are example: DFMMAIL, ARMMAIL...</p> <p>When loaded for each Center being run, the JCL should be modified to print at an appropriate location.</p>

W2 1999 Software/BJS Changes			The form for 1999 W2 has been completed - we now need to modify the software to accomadate this. JCL and code changes need to be made to the main W2 creation (CPO Unique) software to reference the 1999 W2 Xerox form name. Additionally, new BJS JCL/JOB/RPTs need to be created for reprints of 1998 W2s - in the same manner as 1997's were made. This will allow a user to, at any time, run a 1999, 1998 or 1997 W2 through the BJS, pulling the correct data and correct forms.				Create a copy of code for new 1999 W2 printing capabilities. Modify BJS JCL/JOB/RPT information as needed to enable creation and printing of 1999 forms and reprints of 1998.			
							This will all take place in the YEAREND database #123.			
99000098	Wenger, Teresa	MSFC	10/7/1999	Closed	10/8/1999	None	RC	Small		
CPO Personnel/Mature Changes			Recently, personnel changes have been made in the CPO - requiring changes on print destinations and email notifications in the Center Mature Reports jobs.				JSC NE00002 - For email, replace Deborah Gonzalez with Susan Brown, and print to U2615.			
							LARC and GRC NE00002s - For email, replace Tarrie Hood with Dana Tomasella, and print to U0178.			
							HQ and MSFC NE00002s - For email, replace Nikki Miller with Joyce Griffin - leave print at U0075.

Additional Distribution of 818			Barbara Manthos of HQ, Code M, is requesting a copy of the 818 report, similar to Jim Pizzarelle's delivered biweekly. She is interested in only Code M Centers (JSC, KSC, MSFC, SSC) however the simplest and acceptable solution is to transmit her the full coy from within Job CA00004 at the same time Jim Pizzarelle's is sent.				Add Barbara Manthos, HQ Code M - Bin #28, to the distribution of the 818 Fund Source 1 Report in CA00004. Print 2 copies of the 818 report to the HQ printer for distribution to both Barbara and Jim.			
99000096	Wenger, Teresa	MSFC	10/6/1999	Closed	10/7/1999	None	DR	Small		
HQBIUNLD Condition Codes Incorrect			The biweekly unload HQBIUNLD has been successfully transmitting T&A unload files to HQ, but it is also designed to create extract datasets for the HQ WIMS system, for Bob Ryan. This job has been running the extract modules and creating datasets, however the steps to FTP those datasets to HQ have not been running - probably since implementation in April 1999. It was noticed on 10/6/99 that these steps were all flushed, then confirmed with Mr. Ryan, that he has not been receiving the datasets. The same problem was found in two similar unload jobs, regarding email notifications.				Modify the JCL in the HQBIUNLD to correctly check the Condition Codes. Due to the T&A file unloads, Return Codes will be '4' with successful runs. The condition codes on the FTP steps were not allowing for this. Modify as follows: COND=(4,LE) to COND=(4,LT). {Meaning if '4' is less than all the return codes, do not execute this step.}			
							This COND correction needs to also be made to the email step in HQBIUNLD, the email & FTP steps in HQORNLD, and the email step in ONREQUNL. The HQBIUNLD job must be reloaded to the CA7 automatic scheduler following this fix.

JSC NATANDA to NABWAJ3	To improve consistency, as was done for 99000050, we would like to coordinate with JSC to modify the name of the jobstream to run reports following Job 3 (which CPO technicals submit) from NATANDA to NABWAJ3. There are other NABWAJ3's for other Centers - the consistency will improve the system.		Coordinate this request with Carol Harvey and Sandra Chytka at JSC, to receive their concurrence.  Modify the BJS - JCL, JOB and RPT directory - for the JSC NATANDA to become NABWAJ3.							
99000092	Wenger, Teresa	MSFC	10/1/1999	Closed	10/6/1999	None	RC	Small		
J5PT200 JCL Submit to CA7	Each pay period, the CPO technical team is responsible for manually submitting a JCL member which sends the CPO-created JSC-only 200A report to the JSC fiche system. This is done around 4pm each Wednesday of payweek, avoiding busy system times and to have it delivered to JSC at an appropriate time. At hectic times on this payroll processing day, this manual step is an additional risk for problems, if it is not done at the correct time.  Since it is a simple JCL TSO submit, this can be put on CA7, removing another manual step needed.		Coordinate with NACC CA7 personnel, by creating the CA7 J5PT200 member, to be run on Wednesdays of PayWeek at 4pm CT.

JCL Change for Job 4 202 Report		During Production Payroll processing on 9/28/99, Job CA00004 aborted the 202 report step due to the Work File 5 output size being too small. The size of this report has apparently grown to such a size, since consolidation, that the allocation size previously working, was no longer enough. The evening of the failure, the JCL for the stand-alone 202 report was increased and the report then ran successfully.					Modify the CA00004 JCL to increase the Work File 5 (&&WORKF) allocation size from (CYL,(10,5),RLSE) to (CYL,(50,10),RLSE).			
99000086	Wenger, Teresa	MSFC	9/28/1999	Closed	9/28/1999	None	RC	Small		
Holiday Leave Query		A request has been made through CPO, from MSFC Personnel, to query Center time & attendance data for holiday leave hours. Needed is a count of employees at each Center who charge more than 8 hours of holiday leave. The pay period ending September 11, 1999, can be used for the query.					Load the PPE 9/11/99 T&A flat files into the Development database NPS2-PAY-TADATA file. Create a query (TRWTA) to count the number of employees, by Center, who had greater than 8 hours of holiday leave. Provide the count by Center to CPO for forwarding to the requestor.

Update NPPS UOG Appendix C		SESAAS has been responsible for the "Production Operations Guide for NPPS" in the past - this is Appendix C of the NPPS User Operations Guidelines (UOG). As our team is the primary Production Support team for Consolidated NPPS, we will take the responsibility for getting the UOG up-to-date and maintaining it through the future.					A great deal of CNPPS environment information needs to be added to the current UOG Appendix C. For NPPS Release 7.4, we will work with SESAAS to have all primary information corrected and included. In the future, more time will be spent to include much greater detail on "all" CNPPS specifics, such as year-end W2 processing, and CPO unique utilities and modules.

Make-Operable for 818 Fiscal YE Report		The 818 report for Fiscal Year-to-date information recently errored in Production and a modification to code is necessary to get a successful Fiscal YTD report with Agency totals. This report is required at Fiscal YE, on September 29, 1999. A code modification is scheduled for the 818 report in NPPS Release 7.5, which will include 1620 99000062, modified for this recent error. Due to the needed code modification before the official release, a "make-operable" code modification is requested.				Modify NAB818G as follows:  ##AMT from N9.2 to N10.2 ##RECAP-AMT from N9.2 to N10.2  Stow all NAB818* modules following this Global Data Area change. Buffer Pool for DB129 must be flushed following these modifications.				
99000082	Wenger, Teresa	MSFC	9/8/1999	Closed	3/21/2000	None	RC	Medium		
Archive '97 & '98 YearEnd Transaction Reports		More complete year-end records are needed of transactions done in the "Year-End" database for the duration of time that modifications were made for W2s or SSA reporting. Daily transaction information from the Year-End database would be useful if placed in ADOSS, for each of the ten Centers.				Load the 1998 Year-End data into the YE database and run 201 transaction reports for the period of 12/20/98 through 3/2/99. Combine the reports together to create a full 201 report for the period for each Center. These ten reports will then be placed in ADOSS as "1998 YearEnd 201 Report"s. The 1997 Year-End data will then be loaded and reports will be run for it in a similar manner. Additionally, the feasibility will be checked of creating an Excel spreadsheet (one for each year) listing Center, employee names and SSNs of those having transactions done on them at YE. This would serve as a quick reference for CPO.  This must all be done prior to our setup for 1999 Year-End. The 201s will be kept in the same manner for future years.

Report 5101B Output for CPO			Currently the 5101B report (Edit Update - T&A Processing) is created within Job CA00003 and a 2-sided hardcopy for the entire agency is printed for CPO. This report averages over 1100 pages. The CPO office rarely, if ever, uses the information in this report for Centers other than MSFC - the data is available in other more useful reports or is needed only for Center-only processing rather than CPO responsible tasks. MSFC, as a Center, does need this report, however.				Create an NA05101 BJS option for MSFC which will create the 5101B report and print a 2-sided hardcopy for MSFC payroll to the Class D Xerox printer. The CPO Techs will take responsibility for running this job immediately following Job CA00003, along with the submission of similar reports for JSC. Timing is not a concern as this report is created in less than 3 minutes for the entire Agency.  The NASA 5101B report will still be created within CA00003, however the hardcopy print step will be removed. CPO will be made aware that should a rare emergency occur, this dataset is available for the entire pay period and the CPO Tech team may be contacted, to view it.			
99000080	Wenger, Teresa	MSFC	9/7/1999	Closed	10/8/1999	None	RC	Small		
Report 5101M Output Modification			The 5101M report (Edit Update - MER Processing), which is produced in Job CA00003 is currently being sent to ADOSS as one full report and has also been temporarily printed for CPO use. In order to provide CPO with output that is easiest for them to use, but still reduce hardcopy print - the 5101M sent to ADOSS should be broken apart there, by Center. This would significantly reduce the size of the file a CPO user views, to only the Center of interest. This also allows for more efficient searches of the data. Once CPO is comfortable with the new 5101M setup in ADOSS, the hardcopy print of it will be stopped.				Submit an ADOSS change request to have the 5101M, transmitted in Job 3, broken into 10 sections by Center. Test the success of this change and train CPO on the new setup. Once CPO is comfortable with it, remove the hardcopy print of the 5101M to the Class D printer in the Job 3 JCL.

NPPS Emergency Plans Update			Reference CNPPS 1620 98000021 - August 1998 - which created tools and documented procedures at that time for the case of an emergency where not all 10 T&A datasets could be delivered. These plans need to be updated to reflect the more extensive procedures being prepared, and the recent modification of payroll running in 3 versus 4 days. We also now plan to have the capability of creating an EFT dataset in the Non-EFT format with addresses, in order to have the Treasury send paychecks by mail to home addresses in the case of data not being successfully transmitted to banking institutions and electronically placed in employees' accounts.				Create a utility program that will read an EFT dataset, and put it into the same format as the Non-EFT dataset, by adding each employee's home mail address.			
							Update procedures for emergency situations to reflect up-to-date scenarios and plans.

Count of L&Es Printed			With recent changes made to the NAB559 module of the Leave & Earning process, the count of L&Es printed is now not correct. It is doubling and adding one, to the actual number of L&Es created/printed for the Center. This number is used by each Center's Production Control or Xerox Operator to verify they have received all L&Es.				The code change needed is in NAB559: line 0630 COMPUTE #NUM-OF-LE = #NUM-OF-LE /2 -1 .  With this correction, the count is now correct. For PPE 7/31 - operators were notified immediately of the need to recalculate the number. For next pay period, however, this should be put into place into Production to avoid confusion again that began immediately this pay period. This change should be made on-line Production to the NAB559, same manner as make-operable CNPPS 1620 99000056. This code fix will be released with Core NPPS 7.3.1 in late August/September.				
99000062	Wenger, Teresa	MSFC	8/2/1999	Closed	8/5/1999	None	RC	Small			
Redirect Treasury Transmission to Hyattsville			Per request of the Austin Treasury, the transmissions of our EFT and Non-EFT files should be sent directly to Hyattsville, Maryland - rather than to Austin, Texas. The process will change slightly, access needs to be established at both Hyattsville and at MSFC on NAPROD.				The JCL which NDMs the two files to the Treasury will be modified according to access granted and decisions made of dataset naming conventions, etc. The files on NAPROD remain as they are, however datasets are now created at Hyattsville, rather than tapes created at Austin. Hyattsville will send back reports (in datasets) to NAPROD which will list Control Numbers to be used for CPO's ECS verification now - rather than the previous tapes numbers. These reports will be available on NAPROD within 45 minutes following the transmission to Hyattsville. They will be printed in the CPO office with an email to CPO notifying of their arrival. Copies of JCL, reports, access requests, etc. are in the folder for this 1620.

Transmissions to ADOSS from CPO			The previous JCL method of transmitting report datasets to ADOSS needed to be modified in July due to an upgrade of the FTP system within NAPROD. The FTP transmissions during the week of Production processing on July 6th, all failed. Following diagnostics by NACC and the ADOSS vendor - it was determined that the second occurrence of "agepo" in the JCL was causing a problem. Centers send data with two occurrences of their ID/directories as CPO does - however only this CPO name was having the problem.				In any CPO JCL sending datasets to ADOSS with "agepo" - ensure that the second occurrence referencing the subdirectory is removed. This includes, but is not limited to - Jobs CA00003, CA00004 and ADOSSAJ5.

Reorganize W2 Batch Job Names			Currently the processing of W2s at year-end is a time-consuming, confusing process. Part of the confusion comes from the manner in which the Jobs were originally named. CASH AWDS W-2 PRT TO CTR CAW2CCT REG W2 PRINT FOR CTRS CAW2RCT W2 WAGE & TAX -SINGLE SSN CA418W2 CASH AWDS W-2 PRINT CAW2CPR REG W2 PRINT FORMAT CAW2REG 1997 CASH W2 REPRINT CA97CW2 CASH AWDS W2-PRT FORMAT CAW2CSH REG W2 PRINT CAW2RPR 1997 REG W2 REPRINT CA97RW2 CASH AWDS WORFILE SPLIT CAW2CSP REG W2 WORKFILE SPLIT CAW2RSP 1998 CASH W2 REPRINT CAW2C01 1998 REG W2 REPRINT CAW2R01				We plan to rename/reorganize the W2 processes - giving the jobs names of numerical order with better descriptions. This will allow others who need to step in and assist with the W2s, a better understanding of the sequencing and reasoning behind the jobs.  All parts of BJS will need to be modified - JCL, JOB and RPT.

FEGLI Age Bracket Tool			Reference the NPPS 1620 99000077, concerning a problem with the personnel mature process in calculating a new employee's FEGLI Age Bracket correctly. The fix for this problem will be put in place in Production with Release 7.3.1 in September. Until that time, new hires need to have their Age Brackets updated to accurately withhold FEGLI amounts.				NPTL0028 (released with 7.2.2) can be used to remedy this until the fix is installed. Each pay period until 7.3.1 software has been installed into Production, NPTL0028 needs to be run just prior to Job 3 with the computation date to extend through the pay period ending date of the period being processed.			
99000056	Wenger, Teresa	MSFC	7/20/1999	Closed	7/22/1999	None	RC	Small		
Make Operable 7.3 Installation			Due to needed changes discovered with the 7.3 Release, a "make-operable" installation of modules NAB555, NAB557 and NAB559 into Production NPPS is necessary. Changes were needed for wage shift information, the Xerox code name and the page shifting of data on the forms.				NAB555, NAB557 and NAB559 should be installed to Production immediately following the full NPPS 7.3 installation. The next release of NPPS software will include these modified modules.

NPPS Software Release 7.3 Changes for CNPPS	Changes will be made to the CNPPS Production environment according to the NPPS 7.3 Release VDD. However, additional modifications need to be made to the Batch Job Scheduler system, to CPO Site Unique software, and to the CPO operational steps.		(1) Modify work file &&MASTER LRECL to 9313 and BLKSIZE to 27939 for all JCL members using this temporary file. This includes 62 members/jobs - they are listed in detail on the attachment. (2) Employee Express Daily: See Attachment. (3) Employee Express Biweekly: See Attachment. (4) Leave & Earnings Statements: See Attachment. (5) Operational changes: (a) When scheduling Job CA00004 now, the batch number for the new hire data will automatically default to the pay period - we will no longer need to manually modify the dataset prior to transmission. (b) No longer a need to review/confirm 'bad' data in Bond dataset prior to biweekly transmissions. (c) Instruct/remind HQ to remove their site unique 818 report, no longer needed due to core OIG breakout.							
99000054	Sanders, Craig	LeRC	7/9/1999	Closed	7/13/1999	None	RC	Small		
Additional Data Unload for CA7 Schedule	Glenn (Lewis) Research Center would like to have their current weekly data unload run an additional third time during the biweek period. This will be the same unload run from NAPROD, just at an additional time - each Friday following payroll processing.		Modify the NPPS CA7 schedule and coordinate with CA7 personnel to have the additional job added, tested and monitored through CA7.

Title	Description						Recommended Action			
99000047	Gawronski, Ed	KSC	5/24/1999	Closed	5/26/1999	None	RC	Small	Add NA00309 to the JCL for the NABWONR KSC job. Add a step in the NABWCPY to copy the NA309 dataset to the KSC transient storage area. The BJSRPT dataset already contains the necessary information.	
Add NA00309 to KSC NABWONR		Due to KSC Central Budget Office requirements, there is a need to start printing the OT/CT Credit Hr Report, Job No NA00309, every pay period. Please add it to the batch of reports kicked off by job no. NABWONR so that it is printed bi-weekly along with the other reports.								
99000046	Wenger, Teresa	MSFC	5/21/1999	Closed	7/29/1999	None	RC	Small	Create a BJS non-consolidated report (CABNDRF) which CPO users may run for their individual Centers to list all Bond refunds for the current pay period. Write a simple query report listing the Center, Name, SSN, Total Bond Refund and Duty Status. These will print in the CPO office, printer U2615.	
Bond Refund Query		An automated query would be helpful to reduce the manual search of data that is needed, or the overlooking of information that happens each pay period in relation to Bond refunds. CPO needs to know all Bond refunds that occur at all Centers each pay period in order to balance the Center's payroll. Bond refunds due to cancellation will show on the Center's 201 Transaction report, however Bond refunds due to termination do NOT show on the 201 report. The CPO technician must search through QTAR to find the total refund amounts. This is a time consuming effort.								
							The PAY-CUR-DOL(32) field reflects the total bond refund amount.			
							Validation may be done by viewing the BOND screen online in NPPS.

Add Two MSFC Jobs to CA7	MSFC Personnel has two TSO-submittable jobs that need to be routinely run and are perfect candidates for the Automatic Scheduler, CA7. One needs to be run every Thursday of non-pay weeks at 5pm, the other on Tuesday of pay-weeks with the biweekly payroll data unloads at 11pm. The CA7 Scheduling Request Forms are attached, along with the modified NPPS CA7 Schedule spreadsheet. The JCL for these two jobs has been loaded into the MSAOH.NPPSPP.SCHED.MASTER.CA7 PDS - members MSPR1EXA and MSPR1EXB.		Work with the NACC CA7 contacts to have these two members loaded into the NAPROD CA7 Scheduler, coordinate tests, and place them onto the NPPS CA7 Schedule for monitoring.							
99000040	Wenger, Teresa	MSFC	5/14/1999	Closed	5/20/1999	None	RC	Small		
Analyze and Modify Job CA00009	The current JCL for CA00009 in Production runs NAB6070 & prints the report, then runs NAB6080, and finally NAB6070 again but with no report printed. With this setup, the 6070 report "from Job 9" is giving output as if "0" people have had their normals recalculated. We know this to be incorrect especially with the recent change in biweekly FEGLI age group updating. Per advice/support from SESAAS, we will keep both 6070 reports as permanent datasets and review the results - the second 6070 report will likely show numbers of recalculations that were actually done. If so, this is the report that will be given to CPO following the running of CA00009.		Test a payroll cycle concluding with CA00009, keeping both 6070 reports as permanent. If the second report has the counts expected, modify the JCL to have the second 6070 report stay as a permanent dataset that will be the only one printed to the CPO office upon completion. The first 6070 report can be made temporary as it will not be printed.

GSFC ADOSS Access	Goddard Space Flight Center has gained access to the Administrative Data Optical Storage System (ADOSS), and will start to transition reports to it beginning with the largest. GSFC runs a quarterly NA00423 job, which produces a report with roughly 3400+ pages. This is the Individual Pay Record and they run it quarterly, choosing all employees. They would like to be able to still print the 423 report if only an individual is chosen, but want the quarterly report to be sent to ADOSS. Another large report GSFC wants transmitted to ADOSS is the 200A Master Employee Record (MER) report. We currently pick up the CPO-created 200A dataset and print it to GSFC as a CPO-tech biweekly step. They would like this sent to ADOSS in the future rather than to a printer.		<p>Create an additional 423 job which will send a quarterly/complete 423 report to ADOSS with descriptive comments, names, describing it as such. Leave the current NA00423 set to deliver to the printer, but add a BJS pop-up comment in the JCL, to remind users that "this job is for individual 423 reports - use the new Quarterly 423 job for full center employee runs.."</p> <p>Modify the CPO-technical biweekly TSO job GSPT200, to send the CPO-created dataset to a specified GSFC ADOSS directory, rather than to the GSFC printer.</p> <p>Security for these reports will be worked with the NACC Data Administrator for ADOSS.</p>							
99000038	Wenger, Teresa	MSFC	5/10/1999	Closed	5/11/1999	None	RC	Small		
Removal of "STARTUP" JCL	When Consolidation of Payroll was underway, three JCL members were made standard in the Batch Job Scheduler (BJS) system: UPSTART, RESTART, STARTUP. A recent SESAAS core software release brought to our attention that only UPSTART and RESTART are standard JCL. A search was done for any mention of "STARTUP" in the BJS system and none was found. The STARTUP member was removed from the CPO-TEST environment several months ago - there have been no ill side effects. This unnecessary member should be removed from all CNPPS environments.		Remove the STARTUP JCL member from the online BJS and also from the JCL datasets in TSO.

Null Bond Co-Owner Names		We have had a data problem in Production NPPS with an employee who has 7 Bonds and when the Bond dataset is being created for transmission, one of the Bond Co-Owner names is appearing as a blank. On-line in NPPS, the Bond Co-Owner IDs are all displayed, however there are blank lines/diplays among them. The occurences of the data file's periodic group for Bonds has occurrences with a null value among the 7 valid names. The data problem could not be corrected via on-line changes in NPPS, tools to modify the occurrence values was the only method that would work. Testing was done by both SESAAS and again late last week in a PayCon test database - the tools appear to successfully fix the problem.					The tools need to be run in Production to fix the data problem there - they affect only one SSN in one center. The tool names are BONDFIX1 and BONDFIX2 - they were created for us by SESAAS. They should be run prior to Job 3 beginning.			
99000032	Ryan, Bob	HQ	4/22/1999	Closed	4/27/1999	None	RC	Small		
HQ CAPPS/WIMS Data Extract		Tuesday Dotson has requested a new lookup table for the Sybase WIMS application, on Organizations by Center. This data should be updated on a Biweekly basis and include the following fields: EMPL_ASGND_ORGNZTN_NAME (A30) INSTALL (A4) INSTALL_NAME (A30) ORGASSIGN (A5)					Add a query to the HQBIUNLD, run each Thursday of non-pay week, to extract and FTP the requested data to HQ. The program, EXTRORGC, should reside in the Headquarters library. The FTP step to be submitted at HQ is ORGUNLD.

99000029	Wenger, Teresa	MSFC	4/20/1999	Closed	4/22/1999	None	RC	Small		
CA00027 Output Direction			Due to recent office moves and the smaller size of the AdminStar, CA00027 Job, output - these reports should be printed at the network printer located with the AdminStar technical personnel.				Modify CA00027 to send its reports to Class 7 printer, Destination U1113.			
99000028	Wenger, Teresa	MSFC	4/20/1999	Closed	4/22/1999	None	RC	Small		
Transmission of Job CA00005 ADOSS Reports			Due to Payroll processing timeline changes, Job CA00005 will be running on 'normal' Tuesday evenings, following Job CA00004. Due to the limited size of the ADOSS server, we will need to remove the FTP of files to ADOSS from CA00005 and transmit them later, the following day.				Remove the FTP to ADOSS steps in CA00005, and the email to Ray Winkler, ADOSS Administrator. They may be added to the TSO job which is set to submit the 200A reports. These all may be sent to the ADOSS server at the same time, it is capable of holding all of those reports. Rename the previous ADOSS transmission to ADOSSAJ5 and move to AGAOH.NPPSPP.CPO.NASA.BJSJCL, add steps for the CA00005 reports and an additional email note for their specific transmission.

Title	Description						Recommended Action			
99000027	Wenger, Teresa	MSFC	4/6/1999	Closed	4/8/1999	None	RC	Small	<p>Create a jobstream (CABWMS4) for MSFC biweekly runs following Job 4. This jobstream will automatically schedule and submit the following jobs: CA00303, CA00304, CA00305, CA00306, CA00307, CA00313, CA00405 and NA00818.</p> <p>Modify JCL, JOB and RPT information accordingly.</p> <p>Notify and train appropriate CPO personnel.</p>	
Create Single Payroll Jobstream for MSFC	There are currently eight (8) reports that must be run each biweekly pay period by the CPO/MSFC payroll functional. In order to make her task more efficient, a single jobstream could be built to allow her to schedule only one job, rather than eight, and produce all needed output.									
99000026	Wenger, Teresa	MSFC	4/6/1999	Closed	4/8/1999	None	RC	Small	<p>Remove the FTP to the ADOSS server and the Email notification to Ray Winkler from the non-consolidated CA00200 JCL. Then reload that JCL to Production for all centers.</p> <p>Create a single JCL member within ..CPO.NONCON.BJSJCL that will FTP all ten 200A datasets to the ADOSS server, and will send one Email message to Ray Winkler, notifying him of the completion of the task.</p>	
Transmission of 200A Reports to ADOSS	Currently, each center's Master Employee Record (MER) or 200A report is transmitted to the ADOSS server on a typical Wednesday morning of Payroll processing week. At this time, all reports from the prior night's processing of Job 4 have been extracted or removed from the server, allowing plenty of room. With the current plans for condensing the payroll processing week, we will need to run the 200A reports immediately following Job 4 on Tuesday nights. However, we will be unable to let the datasets be transmitted to the ADOSS server at this time. One TSO-submittable job could be created to run during the day on Wednesday to quickly send the reports to ADOSS - this would not interfere with other NPPS processing during that day.

Modify CA00027 Query File		The users have requested a change to update terminated users in AdminSTAR when we run the bi-weekly refresh. In order to make this change we need the JCL (CA00027) that executes RLB27QRY modified to create a file with just the previous two weeks data instead of a cumulative history.					The only change needed should be in the NAT01 step of the JCL where the CA27QR2 and CA27MTY files are created. CMWKF01 and CMWKF02 need to be changed from DISP=(MOD,KEEP) to DISP=(NEW,CATLG,DELETE) and the UNIT, SPACE, and DCB need to be set up similar to CMWKF03. Each will also need a (MOD,DELETE,DELETE) step at the beginning so they may be created new.			
99000022	Stokes, Dianne	JSC	3/9/1999	Closed	3/9/1999	None	RC	Small		
JSC Report Distribution		JSC needs the following changes made to the distribution of NPPS reports:  Replace H. Hartman with S. Braymer (his 1 copy of 351) Modify location for D. Stokes - from 140K to 140C Modify location for N. Humphrey - from 140E to 140H Modify location for J. Barnes - from 140G to 140B Modify any reference to Rm 970A or 970B - replace with just 970					Make the above changes in the BJSRPT dataset and reload to Production.

Modify CA00555 Submission Process			Currently the CA00555, biweekly non-consolidated job to create the Leave & Earnings Statements, must be run one center at a time - ten jobs are scheduled and submitted, monitoring each one's progress. Now that the new Agency L&E process has been in place for two successful months, this situation can be improved by adding them to the CABWAJ4 jobstream - which submits three other CPO non-consolidated jobs in one step.				Add the CA00555 job to the CABWAJ4 (CPO Biweekly After Job 4) runstream to be automatically run in the biweekly process. This will eliminate the ten individual Schedule and Submit steps. Modify the non-con CABWAJ4 JCL and BJS JOB datasets as necessary.			
99000020	Wenger, Teresa	MSFC	3/5/1999	Closed	6/10/1999	None	RC	Small		
Modify Tape Creations			NACC would like to have NAPROD tape creation 100% automated. The majority of our tapes are created in the silos, however we have a few tapes for NPPS that are still being created in the manual tape drives. Any unnecessary creation of tapes should be eliminated, and any that are needed should be moved to the silo, if agreeable with recipient. Much of the initially created JCL contained tape creation steps, due to inheriting old JCL and the rush to create the new consolidation enrionment w/minimal impact due to changes. However, those needs have been eliminated because of the use of permanent datasets rather than temporary, and our experience with the environment.				Check with SSA to determine if they can read a 36TRK 3490 tape, from our silo. The manual drive tapes are 3480. Any modification to the CA00022 job in Year-End will depend on that. All other tapes should be created in the silo with UNIT=STK. We have all of our backups already using the silos. The recent tapes created and noticed by NACC were from on-request reports. Determine all JCL which still contains steps to create tapes. If they are needed, change the UNIT=CART to UNIT=STK - few, if any, should actually be needed. For all those unnecessary - delete the tape creation step from the JCL and modify the BJSJOB dataset to ensure Output Type="H".

Remove Core Ames Printing Duplications			There are 46 Core Ames reports that routinely run biweekly and send output both to an ARMOV transient storage dataset, and to the Ames JES SPOOL for printing. This is a duplication of effort, as the datasets placed on transient storage are then picked up on the Ames LPAR and are made available for printing in the same manner as the reports sent to the JES SPOOL. Agreement has been reached to remove the "printing" steps to Ames Class A in each of these 46 jobs, leaving the steps alone (in jobs NABWCPY and NEBWCPY) that place the reports on transient storage.	Remove the (typically) SYSPRT01 steps in the following JCL members for Ames. Pay close attention to referbacks in the NAT91 step - modify them to ex. NAT01.NATURAL. Reload the JCL upon completion.  Personnel - NE00252, NE00350, NE00351; Payroll - NA00100, NA00101, NA00102, NA00103, NA00104, NA00106, NA00107, NA00110, NA00111, NA00117, NA00118, NA00119, NA00201, NA00202, NA00203, NA00204, NA00301, NA00302, NA00303, NA00304, NA00305, NA00306, NA00307, NA00309, NA00310, NA00311, NA0311R, NA00312, NA00313, NA00400, NA00401, NA00402, NA00404, NA00405, NA00410, NA00411, NA00412, NA00421, NA00422, NA00423, NA00426, NA00456, NA00818.

Archival Storage of 818 Reports		At the time of consolidation of the 818 report with Agency totals, plans were made to eventually send it biweekly to the archival storage system. When this happened in the Fall of 1998, a new system was undergoing implementation, ADOSS - Administrative Data Optical Storage. Reference CNPPS 1620 98000046. Due to other efforts, the 818 transmission to ADOSS was delayed. It now needs to be setup for a biweekly transmission from Payroll Job CA00004.		(1) Request through ADOSS procedures for the consolidated NASA 818 report to be built in ADOSS, with access granted to CPO, Lou Nosenzo and Carolyn Plank. (2) Modify NASA JCL for CA00004 to continue the print to Jim Pizzarelle at HQ, but remove the print to MSFC Personnel printer U0501, and add the FTP transmission to ADOSS with appropriate file names and passwords. (3) Modify the NASA JCL for CA00818, which previously had an ADOSS step commented out as its only output. It should now print the on-request CA00818 report to the CPO printer U0075, but have a message displayed as the job is scheduled, to notify the user that it will print there. In the case of Lou or Carolyn needing this report, this will be their notification of the printing direction and will allow them to call the CPO Tech team to have it temporarily modified if necessary, for their use. (4) FTP the previous consolidated 818 reports saved as datasets since November 1998, to ADOSS. (5) Notify appropriate parties of this task completion for new method of retrieving the consolidated 818 report.						
99000017	Gawronski, Ed	KSC	2/24/1999	Closed	3/4/1999	None	RC	Small		
KSC L&E Mail Sort Problem		The Agency Leave & Earnings Statements created for KSC can not be sorted or given the correct mailing code per the KSC mailing requirements, from the NPPS core jobs for over 500 employees. Discussions have been held with KSC and CPO Technicals, and KSC, MSFC and CPO Functionals. The most viable option is to place a center unique program in the JCL that is run to create KSC's L&E documents, which will place the correct mailing codes in the L&E dataset. A KSC unique file is already maintained which contains the mailing codes needed.		The KSC Technical will work with CPO Technicals in creating a unique job which will read the core-created L&E dataset, replace the mail codes with correct ones, then create the final dataset to be kept for 5 pay periods and used for the initial print and any future reprints. The program will reside in the KSNPPRD1 library, to allow the KSC technical to modify in the future as necessary. The CPO Technicals maintain the core CA00555 JCL which will invoke this program and result in the correct, final L&E dataset.

Renaming of Lewis Research Center		Effective March 1, 1999, Lewis Research Center is being renamed to "Glenn Research Center". Changes must be made within NPPS to accommodate this change and have the new name reflected on reports and other output products.					The following changes must be made in the Production environment on the evening of February 28, 1999. The first two changes will be followed with an NPPS 1620 to document required core table change:  (1) AGENCY (NN22) - change to "Glenn Research Center"; (2) TINSTAL1(2200) - change to "Glenn Research Center"; (3) TINSTALL (2200) - change to "Glenn Research Center"; (4) CTLPER (2200) - "Glenn Research Center"; (5) BJS Report and JOB information referencing acronymn of "LERC" - change to "GRC" and reload with TOOL940 & TOOL960; (6) Emails from JCL for CA00555, NA00556 & NE00002 to "lerc.nasa.gov" and referencing "LERC" in subject - changed to "grc.nasa.gov" and "GRC"; (7) Modify hardcoded "LERC" in (2) Retirement Card modules AGB513 and AGB514 to "GRC".			
99000015	Wenger, Teresa	MSFC	2/19/1999	Closed	4/9/1999	None	RC	Medium		
Clean-up of Center BJS Report Options		There are numerous Report options that are being maintained in the Production NPPS environment for Centers that they do not and will not run. These should be reviewed for necessity and removed if the Center confirms they are not needed. If they are left in Production, the CPO Technical team will be required to perform maintenance on unused jobs during Release Installations and for other Center update requests regarding printing, distribution, etc.					A matrix has been created and distributed to all Centers, displaying the report options they have available and denoting which ones have not yet been used. The Centers were asked to reply by 2/19/99 if any of the unused reports should be maintained. Responses have been gathered and the final matrix is attached here, showing the jobs which should be removed from the Production environment BJS, by Center.  For each the BJS (JCL/JOB/RPT) information must be removed both online within NPPS, and in the TSO datasets.

Overlay Printing for MSFC Personnel Reports	MSFC Personnel has been unable to print the NE00355 (CSRS Statement of Benefits) or the NE00367 (FERS Statement of Benefits) on their Xerox overlays, from NPPS, since consolidation. The technical team tried unsuccessfully at the time of MSFC's cutover to make these documents print correctly. With more time available now, these need to be revisited.		<p>There are JDE commands available and the forms do exists in the MSFC Xerox printer. Work needs to be done with the Xerox printer operator to modify the JCL to correctly use the overlay forms with the data from core NPPS. The reports will need to go to Class C, DEST=HCCA. The forms should either be invoked by appending datasets with the JDE commands or a direct call of the form name in the SYSOUT.</p> <p>Samples are attached to the original 1620.</p>							
99000011	Wenger, Teresa	MSFC	1/28/1999	Closed	2/1/1999	None	RC	Small		
Job CA00003 First Report of T&A Errors	<p>There is a module run within Job 3, that creates a workfile given a title header of "First Report of T&amp;A Errors". Typically this file is empty - no warning messages placed in it. However, during processing PPE 1/16/99, two messages were noticed as being written from this module into this workfile. The Production JCL currently does nothing with that workfile other than to write its contents to the TSO Job Output. This is viewable only by technical support and the messages are quite hidden within other output - could easily have been missed in the past:</p> <p>* T&amp;A CARD DOES NOT HAVE A MATCHING PAY RECORD. 6200 ----ssn----- This is a warning to CPO to ensure the correct Payroll data gets entered immediately following Job 3 for this person.</p>		<p>Per agreement with CPO, we will print this information report to their office when Job 3 completes. It will be kept as a permanent dataset, NA3100, within Job 3 and will be sent to printer U0075. This will help ensure CPO is aware of all actions necessary for them to perform following T&amp;A processing.</p>

Modify CAEE002 Submission Process			Currently the CAEE002, biweekly non-consolidated job, must be run one center at a time - ten jobs are scheduled and submitted, monitoring each one's progress. They are best run only one at a time due to updates to core files - errors have occurred in the past with two or more running together. This situation can be improved by modifying job names so all are identical. To make the biweekly payroll process run smoother & more efficiently, perhaps these jobs could be added to the CABWAJ4 jobstream - which submits other CPO non-consolidated jobs in one step.				Modify the Job names of the CAEE002s, so they are all identical with AGPPAYRX names. This will prevent more than one from running at a time, regardless of when they are scheduled and submitted through NPPS.			
							Also, if feasible, add the CAEE002 job to the CABWAJ4 (CPO Biweekly After Job 4) runstream to be automatically run with this current job already done in the biweekly process. This would eliminate the ten individual Schedule and Submit steps. Note: When the CAEE002 is consolidated through core changes, this step can easily be reversed. Until then, a good bit of effort will be saved!			
99000009	Barkley, Lynda	MSFC	1/26/1999	Closed	1/28/1999	None	RC	Small		
Efficient Retrieval of L&Es			CPO is quite often needing the new L&E documents printed for individuals across the agency, in order to research calls and questions. Per Release 7.1 and CNPPS 1620 98000038, jobs were only set up for the center to print individual L&Es, at their site. When CPO has needed an L&E, they would call the technical group to have one created and redirected to print on the form in the 4201 basement. This process is manual and timely - for both the technical and the functional who must wait. A more efficient method is needed.				Create a new CPO non-consolidated jobstream, named CALEBLK, which will be loaded for each center. This job can be run only by CPO personnel and will print the L&E for the person and period specified, immediately to the printer in their office, 4200-Rm 612. It will not be on an overly form, but each CPO person will be given a blank form to keep at their desk if they are unsure of an item.			
							This gives immediate results to CPO and eliminates the need for technical intervention.

Modify AGNPINQ1 Print Options	There is a library in CPO-PRODUCTION, AGNPINQ1, for specified functionals to use for queries of the database. The highest volume user of this library is Karen Johnson, CPO. We have just had a network printer outside Karen's office door made accessible through NAPROD. This printer needs to be added to the AGNPINQ1 menus/jobs as an option for her, and others. The DEST is U0178.		Modify the layout and Processing Rules in Map AGMCOMM to add the printer U0178. Also, coordinate with Karen for changes to the descriptions of printers on this screen. Several appear to need modifications to be clearer.							
99000007	Wenger, Teresa	MSFC	1/15/1999	Closed	1/19/1999	None	RC	Small		
JSC NE00081 JCL Notification Outdated	During the past year, ACF2 has been upgraded in NAPROD. Due to this a notification method previously in place for JSC's NE00081 is no longer working as it once did. There are 3 lines at the beginning of the NE00081 JCL attempting to notify the "user" submitting the job, when it is complete. ACF2 no longer supports the method used, and causes an error, then submitting it's own corrected version, which runs with no UserID/Owner attached. The NE00081 ends up running functionally correct, however the jobs created in the output are technically confusing and not up-to-date with ACF2.		Modify JSC's NE00081 by removing lines 2 through 4 and reloading.  000001 /* JOBSTART NE00081 W 000002 //USER-ID4 JOB (J5AOHNPPS001,NE00081),'NPPS',MSGLEVEL=(1,1), 000003 // CLASS=F,MSGCLASS=A, 000004 // NOTIFY=USER-ID

CPO Technical Tools 980 and 990 Incorrect	Utility tools for technical use in "loading" and "dumping" BJS Print Directory information were established at the beginning of Payroll Consolidation. These tools reside in each Center's ...CPO.xxxx.BJSJCL PDS. The JCL members are TOOL980 & TOOL990, software modules are by the same name. These tools do not successfully load all Print Directory information - the printer Models and Types do not fit correctly in the field lengths used for manipulation between datasets (AGAOH.NPPSPP.CPO.xxxx.BJSRPT) and online BJS. This was not critical in the past, until increased use of the BJS Print Directory occurred with the use of Center SF50 print options. Now the tools would be very useful - if they worked correctly.		Modify modules TOOL980 and TOOL990 to successfully load Printer information as it is modified in the dataset - and to successfully reverse or "dump" the data from online BJS. Each field length in the dataset and software modules manipulating it, must be analyzed and corrected.							
99000005	Wenger, Teresa	MSFC	1/15/1999	Closed	1/19/1999	None	RC	Small		
Send Emails for ADOSS Reports	Currently the ADOSS Data Administrator is notified by phone or manual emails when Production Payroll is run and specific reports have been sent to the ADOSS server. This could be done automatically through the CNPPS JCL.		Add an email step to each job (JCL member) that sends a report to ADOSS, notifying the ADOSS Data Administrator - Ray Winkler. It will have a Subject only, stating the reports being sent. The following jobs will have this step added: NASA - CA00003, CA00004, CA00005, CA00314, CA00401, CA00402, CA00404, CA00456, CA00025, CA00026, CA00014; NON-CONSolidated - (CA00200 done per CNPPS 1620 9900004) CA00303, CA00304, CA00305, CA00306, CA00307, CA00313, CA00405, CA00021; MSFC - NA00301, NA00302, NA00402, NA00404, NA00456.

Modify CA00200 Report Process For Efficiency		The non-consolidated CA00200 reports are currently run individually each pay period, and the ADOSS Data Administrator is then notified by phone upon their completion to ensure a successful extract to the archival data system. Emails from the mainframe have been successfully implemented elsewhere, but are not yet in this job. Also, there is a non-consolidated job CABWAJ4 (CPO Biweekly After Job 4) which in one step schedules and submits two other non-consolidated jobs needed by each center, each pay period (513 and 514). This job runs the same day as the CA00200s, following the same process, once for each center.					Include the CA00200 report inside the CABWAJ4 runstream, modifying JCL, JOB and RPT information for BJS. This will eliminate running 10 individual jobs each pay period.  Also, include an email inside the CA00200 job, to send a message to the ADOSS Data Administrator informing him of the dataset/report that has just been sent to the ADOSS server. This will immediately notify him as each report is ready for him to extract.			
99000003	Johnson, Fred	HQ	1/13/1999	Closed	1/15/1999	None	RC	Small		
ModifyOutput Default of NE00351		Four additional copies of Headquarters Personnel report NE00351 are needed each time it is run. The default number of copies should be increased.					Headquarter's JCL has the number of copies hard-coded, for Personnel reports. In the JCL for NE00351 modify the print step line "COPIES=39" to "COPIES=43". In the BJSRPT (report distribution), modify the lines for NE00351 to state "42" rather than "38" BOUND reports, leaving the "1" UNBOUND distribution line as-is.

SF50 Work File Sizes	Several errors have been occurring in the SF50 process, during ACI, due to allocation of some work files being too small. Three of the larger centers saw immediate errors when ACI began, with work files 6 and 9 not large enough to accommodate the data. These temporary files were originally allocated in only one Track.		Modify the JCL for all ten centers, for NE0SF50 and NE00400, to increase the allocation of the temporary work files with Cylinders. Specifically, on STEP02 - work files 2, 3 and 4 should be increased to (CYL,(1,1)); work files 6 and 9 should be increased to (CYL,(10,5)).							
99000001	Wenger, Teresa	MSFC	1/5/1999	Closed	1/6/1999	None	RC	Small		
Email Notifications in Personnel Mature Report Jobs	In order to inform CPO in a more timely manner, when each Center runs their Personnel Matures and their reports 358 & 359 have printed, emails could be included in each NE00002 job. CPO personnel often have to check their printer to see if their center has run a mature - they waste time or aren't aware the report is waiting for them to begin their work.		Add a step inside of each Center's NE00002 (Mature Reports) job to send an email stating "job completion" to the appropriate CPO Financial Specialist and Accounting Technician.

NPPS Core Software Release 7.2 Changes	NPPS Release 7.2 requires a great deal of changes to the CNPPS BJS for each center, due to Personnel SF50 and SF52 modifications. A new module must be invoked and datasets manipulated, to provide new printing options that are now available.		<p>The effective date for moving these changes to Production, is the evening of December 21, 1998. Extensive details are provided in the 1620's folder for the changes needed for each center's BJS. This includes their Print Directory, Report Directory, Job Directory and JCL. Here is a summary of each center's chosen printing options, which drives the changes needed:</p> <p>Headquarters/50s only - Xerox, Impact &amp; Laser (setting up an HPLJ5);  Ames/50s only - Xerox &amp; Laser (setting up an HPLJ5);  Lewis/50s &amp; 52s - Xerox, Impact &amp; Laser; Langley/50s &amp; 52s - Xerox &amp; Laser (ready to go as soon as current Laser forms are used up with old printing setup);  Dryden/50s only - Impact; Goddard/50s only - Xerox, Impact &amp; Laser (setting up an HPLJ5);  Marshall/50s only - Xerox, Impact &amp; Laser; Stennis/50s only - Xerox &amp; Impact; Johnson/50s only - Xerox &amp; Laser; Kennedy/50s &amp; 52s - Xerox, Impact &amp; Laser (resolving issues on each).</p>							
98000048	Wenger, Teresa	MSFC	11/30/1998	Closed	12/4/1998	None	RC	Small		
Distribution of Consolidated 111 Report	Per referenced CCR, Johnetta Thomas of the Consolidated Travel Office at JSC needs the 111 (Permanent Change of Station) report. There was a misunderstanding in the requirements of this referenced CCR, however. It was originally understood that she needed only JSC's portion of the report. It is now clear that she needs all centers' data - an entire Consolidated 111 report.		<p>The consolidated 111 report is created in CA00005. An additional print step can be added to the JCL for job CA00005 to send a copy to Johnetta Thomas at JSC. The NASA BJS RPT Distribution data should be changed to have her named added to the CA00005 report 111 distribution listing on the banner page. One copy will be sent to Johnetta Thomas, JSC, T-585 Rm 116.</p> <p>Also, remove the changes made to BJSRPT datasets &amp; loaded to databases, due to 98000044.</p>

Provide Stennis with EFT Listing Report 6090.		Mary Mitchell, Stennis, has requested from CPO a copy of their portion of the EFT Listing Report #6090. They often have problems with the fund transfers to banks and would like to see this detailed listing for their employees. John Alexander has approved their request to have an on-request NA06090 job.					Create the BJS necessary to provide Stennis with this 6090 EFT Listing Report. JCL should be built for an NA06090 job creating an NA6090 dataset. The JOB and RPT information should be created - distribution is to Mary Mitchell at Stennis.			
							Also, add this new job, NA06090, to Stennis' existing single-job-submission NA0AFT5 which schedules and submits all on-request reports they want each pay period.			
							It has no parameter modules associated with it. Output destination should be RMT0.N14JES2.

YEAR-END W2 MODIFICATIONS DUE TO 10/30/98 URGENT RELEASE - TSP YTD			The 418 report and "TSP" online screen for Headquarters errored on 10/29/98 due to an individual reaching the TSP YTD ceiling of \$10,000 for contributions. An NPPS Urgent Release was made to fix the problem by increasing affected fields from N4.2 to N5.2. Modifications are necessary in our CNPPS JCL and software for automated W2s to accomodate these field changes. Module NAB418 creates a dataset used for producing the W2s at year-end.				Work File 5 has been increased in size by 40 characters due to the necessary modifications. We must modify our Year-End W2 JCL which reads the dataset created by module NAB418: LRECL from 429 to 469; BLKSIZE from 8151 to 8911. The CNPPS software modules which read that file and print the data onto the W2 Xerox overlay must also be modified to increase the TSP contributions field from N4.2 to N5.2.

Modify Print Destination and Email Recipients of CA00027			The output from NASA job CA00027 is becoming quite large for the HP LaserJet previously used.				Modify job CA00027 to send its output to Class D Xerox printer, basement 4201. Additionally, add Charmaine Absher as an email recipient - Jacky Davis is a current recipient.			

98000024	Wilson, Jill	MSFC	9/3/1998	Closed	9/14/1998	None	RC	Small
Creation of Jobstream for CPO Non-Consolidated Biweekly Reports		There are currently 4 reports that are non-consolidated and must be run each biweekly pay cycle for each of the 10 centers. This adds up to 40 individual reports to schedule and an even larger multiple of keystrokes to perform this task. This is a monotonous, time-consuming task that can be done more efficiently.					Recommend the creation of a CPO jobstream that will automatically schedule and submit each of the 4 non-consolidated reports for a center. This will reduce time and keystrokes tremendously with only 10 "jobs" to schedule and submit. This job, CABWAJ4 (CPO BiWeekly After Job 4), will schedule reports CA00418, CA00518, CA00513, CA00514. This job can be easily modified in the future if more reports need to be added, or as some become consolidated and move into Job 5 - as 418 & 518 will with the Year-End Release - and then need to be removed from this jobstream.	
JCL, JOB and RPT information will be modified for each of the 10 centers.

Modify Headquarters Biweekly Data Unload			Headquarters Payroll no longer needs core file #230 (NPS2-PAY-TABLES) for processing their Time & Attendance data. Currently file #230 is included in their biweekly unload, running each Thursday night before payroll processing week.				Remove the steps to unload File #230 from AGAOH.NPPSPP.SCHED.MASTER(HQBIUNLD). Reload to CA7 - Automatic Scheduler.				
98000022	Wenger, Teresa	MSFC	8/25/1998	Closed	8/31/1998	None	RC	Small			
Move Processing of New Hire data from Payroll Job 5 to Job 4			All output product datasets are created during Job 4, except for the New Hire dataset for SSA - Child Support Enforcement. By being in Job 5, our processing is "jumbled" and more confusing than it needs to be. We have to process output product transmissions at different times in the cycle. Originally this process was placed in Job 5, thinking mainly of its report as the output and also concern for Job 4 processing time. We would be better off, all around, if this were moved into Job 4. (The step runs in 3 minutes.)				Move the processing of the 457 report and NHIR dataset to Job CA00004. All JOB and RPT data for BJS must be modified. JCL needs to be modified for CA00004 and CA00005 - allocation steps, Natural execution steps, and FTPing to Lasercom (archival data storage). Update the technical Payroll processing procedures and the Operational Runbook. NAPRO25, which NDMs the New Hire dataset, can be run along with all other output product transmissions (NAPROD1, NAPROD2, NAPROD4, NAPROD5) on the mornings immediately following Job 4. (Appropriate NPPS SRS/UOG changes will be made during the current work already in progress. Ref: NPPS 1620 98000074.)

Batch NAT3145 errors no longer doing a Retry		Beginning Aug. 5, 1998, CNPPS has begun to experience batch NAT3145 errors - "Record not available". Prior to this, there is no knowledge of batch NAT3145s - all were handled by error logic instructing "RETRYs". When these happen in batch, there are two possible, unacceptable outcomes: (1) The affected centers' processing is halted until it is realized they each had this error and BJS is cleared and a Submit is done again. Only method of finding out has been a center eventually calling, or Tech team noticing - it has meant as much as 3 hours of time lost. (2) A report may hit a 3145, but appear to the user and NPPS to have run successfully only to find out after several hours that their report was blank and shouldn't have been - thus finding the 3145 and rerunning the report.					This problem may be due to the SAG/Natural upgrade - investigation into that is underway with NACC. Also, our DBA will command Log during the next Center Processing day, Sep. 3, to help trap the problem. In the meantime, however, a better method of finding these errors sooner after they happen, is needed. The only method we currently have would be to check all jobs in the JES Output Queue, one at a time. NACC has given us an alternative. They can load a file SYS-NATURAL-ERROR in our DBAONLY library of DB129 and activate WLKERROR, a Natural error routine. A program, DAILYERR, can be run to print all errors captured since the previous day, and WLKRPT will print all errors on the file sorted by error number. These reports can be run online or in batch, and can be run whenever and as often as we need to for a quick monitoring of the database.

Change Default parameter for report 303		The default parameter data for non-consolidated payroll report CA00303 should be changed to better produce the output actually desired by users.					The parameter date for CA00303 should be the Leave Year Endingn date - 19980103. Change this in the BJSJOB datasets and reload for all 10 CPO non-con center reports. Also modify this for the MSFC NA00303 report.

CPO Site Unique NA00201 Transaction Report without Bach UserIDs	The NA00201 transaction report contains records of all transactions within NPPS, by online users or batch jobs. Following a payroll Job 3, this report contains thousands of batch transactions, causing the CPO to be unable to run it. They can not see what online transactions took place without also getting all batch transactions from Job 3 T&A processing.		CPO Technical support will create a site unique NA00201 report which will exclude all transactions done by UserID "BATCH". This job can then be run on the day following Job 3 to produce a manageable transaction report which CPO can utilize.							
98000016	Kirby, Pam	LaRC	8/4/1998	Closed	8/4/1998	None	RC	Small		
Modify JOB Sequence of Langley's NA05818	Langley has a job NABWAJ5 which runs a series of core reports for them, following Job 5. Within this series of reports is the NA05818 (runs the 818 in 5 ways within one jobstream). The NA05818 had been given a job sequence number which caused it to run before other reports in this NABWAJ5. Langley would like it to be the last to run in the job so that other reports can be printing while it runs - it normally takes about 40 minutes to complete.		Only change required is to modify the job sequence of NA05818 from its 261 to 351. This will place its sequence number higher than all others for Langley. When the NABWAJ5 schedules all of its reports, the NA05818 will be the last one to run.

Modify NPPS Report Distribution for JSC Payroll			Two items: Per Gwen Obert, JSC, her name in the BJS report distribution should be replaced with "PAYROLL". She is no longer the key recipient. Per CPO, it would be helpful for mature reports' banner pages to specify a center. Many say only a name or "Payroll Office", which is fine for center offices. However, this causes CPO to leaf through the pages of the reports to determine whom they belong to, when they receive the reports for all centers.				Modify the Batch Job Submitter (BJS) report distribution datasets as requested. For the NE00002, if there is no center reference, change to ex: "Payroll - DFRC".			
98000014	Williams, Wilma	DFRC	7/23/1998	Closed	7/29/1998	None	RC	Small		
Add Three Payroll Reports to DFRC BJS			The DFRC Payroll Office has routinely requested that CPO FAX them their centers' sections of payroll reports 314, 408 and 420, from the consolidated biweekly reports.  This can be solved by giving DFRC the capability to run their own reports with their own cetners' data, when they need them. CPO does not need to be involved.				Create JCL, JOB and RPT data for DFRC to run on-request jobs NA00314, NA00408 and NA00420. They should print to U2935.

CPO-Headquarters' SF1166 Voucher Report Schedule Numbers			The CPO site unique CA0H406, which creates Headquarters-only and OIG-only vouchers, has inaccurate schedule numbers on its two header pages. Example: P-98-15 should be P-98-15A or P-98-15B; and when the Fiscal year changes in October, the year in the schedule number should also advance.				Modify module RFN406RA to place a schedule number of (es.) P-98-15A on the EFT page, and (ex.) P-98-15B on the non-EFT page. The "A" and "B" being specific to EFT and non-EFT. This module should also be modified to cause the year on the schedule number to advance with the Fiscal Year. For example, the first pay period in October of 1998 should have schedules with P-99-20A and P-99-20B.

Automation of W2 Forms		In order to produce Agency W2s for the approximately 20,000 NASA employees, this process should be automated from NPPS data and produce Xerox overlay W2 forms containing appropriate data.					This 1620 is written for historical documentation purposes, as this was performed for 1997 W2s run in January 1998.	
							The CPO Ooperations Support will use the data from the core jobs 418 & 518 to automatically produce employee W2s. The data will be manipulated through separate modules to create sorted print files. A Xerox overlay form for the W2 will be created. The overlay will have 4 W2s per page with appropriate IRS documentation as required on front and back. An employee with one set of state or local deductions will receive one sheet with these 4 W2s. Employees having multiple state or local deductions will receive multiple W2s for submission to these agencies.

Invalid NEW-INSTALL on Personnel History Record	A record on the NPS2-PER-HISTORY file has an INSTALL of NN23 instead of 2300. This record is not viewable by NPPS customers because NPPS will not let anyone view a record for center NN23 unless they are logged in under center NN23 (which isn't possible because NN23 is not a valid center for security). There is also a record with a center of '9' that should belong to HQ. Other records may be identified that need to be deleted or modified in personnel history based on invalid centers.		Delete the entire NN23 record per e-mail from Lisa Klaugh on 2/19/04. " His OPF has a reassignment in December 1994 that takes him out of DSF and puts him in DFN. The rest of history flows correctly on the organizations. The realignment takes him from DSF to DSJ. There is nothing in his OPF that reflects DSJ, so I would say delete the record. Thanks, Lisa"							
			Obtain concurrence to delete or modify any other records that are identified with invalid centers; run a query against production data to check the NEW-INSTALL field.							
			These records must be deleted with a tool because it is not accessible via NPPS.

ADOSS Emails			Each job that transmits a report to ADOSS sends an email to the ADOSS Administrator to inform them the report is ready to be archived/extracted to the ADOSS system, has gone in the auto-extract on some nights, or has experienced an error in the attempt to transmit.				All emails for ADOSS must be modified to send to Stephen Nelson now, rather than Jonathon.				
			Jonathon Batchelor has been the Administrator, but Stephen Nelson is now taking over this position.								
20030068	Wenger, Teresa	MSFC	5/7/2003	Closed	7/27/2004	None	RC	Small			
Modify Long-Term Care Transmissions with John Hancock			A secure FTP process has been successfully developed with the ICB Award process - this is an improvement over the current Fed-Ex diskette data transfers with John Hancock for LTC. If the process could utilize secure FTPs, it could be more automated, to ensure steps are not neglected.				Work with Brad Harris and Jason Holly, NACC, and Bruce Cafara, John Hancock, to implement the use of secure FTPs using the linux proxy server already established between NAPROD and outside sources.				
			Establish a Control-M, automated job, that would then "pick up" the LTC file from the server approximately Thursday mornings of non-pay processing week, and run the CA00460 steps that load the data to NPPS. (The FTP step could be added to the beginning of the already established TSO-job CA00460.)

2003 FY 2nd Quarter Pension Spreadsheet	OPM has requested the MSFC/CPO gather data to complete a worksheet for FY 2003 2nd Quarter Pensions. The memorandum requesting this in the the 1620 folder.		Run the Query FEHB-HIS in the Production database (DB129) Library AGNPINQ1 using the pay period dates of 01/11/2003 and 03/22/2003. Run the query FEGLIHIS in the Production database (DB129) Library AGNPINQ1 with the date range 01/11/2003 thru 03/22/2003 (ie 760020030111 thru 760020030322) for each center. Print the Grand Total pages for each center from the Report 420 for PPE 03/22/2003. Use the Cost Factors from the Benefits Letter dated January 15, 2003 for the Imputed Costs. Use the Benefits Letter dated March 18, 2003 for the FEHB Imputed Cost Factor. The column Adj Basic Pay from the Report 420 will be used in the column Bi-Weekly Gross Basic Pay; the column Employee Retirement will be used in the Employee Withholdings; the column Employer Retirement will be used in the Agency Contributions. The FEHB-COUNT will be used in the Imputed Cost Actual Enrollment columns. The Aggregate Annual Basic from the query will be used in the FEGLI Imputed Cost column. All the above information will be completed for each center on different excel spreadsheets.

20030055	Johnson, Karen C	MSFC	3/28/2003	Closed	3/31/2003	None	RC	Small	In order to prevent this type of an error from occurring in the future, the technical team will modify NAB460I to cause a "TERMINATE 253", the same fatal error that occurs if a record is sent with an invalid ALC. This will halt all processing, and force a closer review to take place.	
Long Term Care Problem Resolution		The file sent from John Hancock for LTC on March 20th, contained a record with invalid data in it - record 936 out of 1241. This record caused an error in module NAB460I which takes the LTC file and creates a new one with Center code added. The error resulted in a "BJS" message being sent to the job output in TSO (this job, CA00460, is run via TSO), but finished with good return codes of zero. The resulting file contained only 935 LTC records and processing proceeded.								
20030054	Plank, Carolyn	MSFC	3/25/2003	Closed	4/14/2003	None	RC	Small	Query TRW30054 provides the requested data.	
NOAC Query for Retro Payments		To assist with efforts in handling the upcoming retro-payments, please provide a listing of NOACs with SSNs, sorted by Effective Date, for MSFC, since January 12, 2003. Reject any NOACs of 894, 942 or 943. This may be modified and may be used by other Centers - preliminary request at this time.

HQ Biweekly Run of 118 Report	It was noticed that HQ was still running the biweekly 118 Cash Awards Report - with the default of producing all awards paid out by HQ for all of NPPS History. This report was 2379 pages long on February 26, 2003 - and would have been the same length with the identical output - every pay period since October 2002. HQ has not paid out any awards, that show on this report, since October. They've been printing this same report every two weeks.		Bernie Keane at HQ was contacted - asked if this was necessary to continue to print each pay period. She agreed, it is not necessary. The NA00118 should be removed from the biweekly auto-run jobstream NABWAJ5. The NA00118 report will still be available as a manual on-request report, should she need one in the future.  Modify the NABWAJ5 JCL and JOB information. Reload to Production. Delete the dataset for the HQAOH.NPPSPP.C1000.NA118 report - was holding 25 cylinders of space.							
20030036	Gonzalez, Debbie	MSFC	2/26/2003	Closed	4/25/2003	None	RC	Small		
Semi-Annual Headcount Reports	CPO needs specific report/tools to provide required semi-annual headcount report information. This must be provided for pay period ending February 22, 2003.		There are four programs that have been utilized for this purpose in the past. They are going to be made more "clean" in naming conventions and with better notes, during this run. Program names are now HEADCT1, HEADCT2, HEADCT3, HEADCT4 and HEADCT5, all residing in DB129, library AGNPUTIL. JCL used to run them is AGAOH.NPPSPP.JCLUTIL(HEADCNT).  Modules HEADCT1, 2, 3 and 5, may be run in Production following initialization for the needed pay period - they each read payroll history files. Module HEADCT4 must be run prior to initialization.

CNPPS 106 Report Emergency Fix			During testing of Release 8.6.3, a problem was found with the 106 report's additional section regarding the ICB Award totals. There were no headers printing on the PayBlock total pages - making it impossible to tell which pages of information were for which Center.				Per SESAAS, comment out lines 5370 and 5540 - the IF and END-IF (NOAC 987) lines surrounding the header printing.			
			An NPPS core CR has been submitted, for a future Release.							
20030034	Barkley, Lynda	MSFC	2/10/2003	Closed	4/25/2003	None	RC	Small		
Auto-Scheduler - CA7 to Control-M - Transition			The following members in AGAOH.NPPPPP.SCHED.MASTER, KSAOH.NPPSPP.SCHED.MASTER.CA7, MSAOH.NPPSPP.SCHED.MASTER.CA7 and LAAOH.NPPSPP.SCHED.MASTER.CA7 should be coordinated with Craig Saile for implementation into Control M.				The PDS members will be copied over to the new naming standard of AGAOH.NPPSPP.SCHED.MASTER.CTM. The following member FEHBBILL in AGAOH.NPPSPP.SCHED.MASTER.CA7 will need to be modified to support the multiply day processing . The member FEHBBILL will be changed to FEHBBIL1, FEHBBIL2, and FEHBBIL3. The member WEBLIB76 in AGAOH.NPPSPP.CPO.WEBTADS.BJSJCL will be changed to WEBLI76A and WEBLI76B.

2003 FY 1st Quarter Pension Spreadsheet			OPM has requested the MSFC/CPO gather data to complete a worksheet for FY 2003 1st Quarter Pensions. The memorandum requesting this is in the 1620 folder.			Run the Query FEHB-HIS in the Production database (DB129) Library AGNPINQ1 using the pay ending date of 10-05-2002 and 12-28-2002. Run the Query FEGLIHIS in the Production database (DB129) Library AGNPINQ1 with date range 10/05/2002 thru 12/18/2002 (ie 760020021005 thru 760020021228) for each center. Print the Grand Totals pages for each center from the Report 420 for PPE 12-28-2002. Use the Cost Factors from the Benefits Letter dated January 15, 2003. The column Adj Basic Pay from the Report 420 will be used in the column Bi-Weekly Gross Basic Pay; the column Employee Retirement will be used in the Employee Withholdings; the column Employer Retirement will be used in the Agency Contributions. The FEHB-COUNT will be used in the Imputed Cost Actual Enrollment columns. The Aggregate Annual Basic from the query will be used in the FEGLI Imputed Cost column. All the above information will be completed for each center on different spreadsheets.

2002 Agency Leave Year Cost Data	OPM has requested the MSFC/CPO gather data to complete a worksheet for Leave Year 2002 Work Years and Personnel Costs. The memorandum requesting this is in the 1620 folder.		Run the LUMPSU1 program for each center in Production (DB129) library AGNPINQ1. Modify the program with date range 01/13/2002 thru 01/11/2003 (ie 760020020113 thru 760020030111) each time when running for individual center. Print the Report 303 for PPE 1/11/2003 for each center from ADOSS. The OPM Form 1351-C will be completed as follows: The Annual Leave column will be the type AL and RSTLV totals from the Report 303 and the Lump Sum from the query. To calculate the lump sum hours into days (divide the # of hours by 8) for each center. The Annual Lump Sum column will come directly from the query. The Sick Column will be type SL from the Report 303. The Holiday Column will be HOL LV from the Report 303. The Time Off Award column will be TIM OFF from the Report 303. The Other Column will be type ADM LV, CT, CT:REL, COP, COURT LV, CREDIT, EXC LV, GRD LV, HOME LV, JURY LV and MIL LV from the Report 303.							
20030031	Johnson, Karen C	MSFC	2/14/2003	Closed	2/26/2003	None	RC	Small		
CFO Series Queries	CPO has requested various spreadsheets for MSFC (6200) based on OCCODE. One variation will pull codes 0301, 0343, 0501 or 0506. The other variation will pull 0801. Use the query SERIES-W in the AGNPINQ1 production library.		Run the query with both variations, create separate Excel Spreadsheets with the following heading information: Org, Grade, OCC Code, Last Name, First Name, Title and Class Code. Spreadsheets are on Technical Group Drive in Folder CPO Series Spreadsheets.

CA418W2 Removal of Alignment Pages			When a "single W2" is run, to print within the CPO, on plain paper - it always sends 6 sheets of "sample W2s" first. These sheets were originally created to be used for alignment of W2 forms in an impact printer. The code creating them is the NAB418 module. This module is not used to create the real W2s - which are now printed on a Xerox printer, anyway. The alignment sheets are a great waste of paper, as CPO utilizes the ability to print out employees' W2 information quite often, throughout the year.				Please remove the printing of the leading alignment pages from the CA418W2 job.

ACI Mature Report Printing		During annual ACI processing in January, the volume of printing of mature reports increases significantly. With the ten Centers' mature reports dual printing inside the CPO office on Laser printers, the destinations must be modified. Also, KSC and MSFC use small Laser printers and have a similar problem. The alternate printing should be set for the first morning of ACI processing until the time that each Center has completed during that pay period.					<p>Immediately after Leave Yearend processing is complete - the evening of January 15, 2003:</p> <p>Modify all NE00002 jobs except for SSC and DFRC, to comment out the 'normal' CPO dual print steps and send the 358 &amp; 359 reports to Class D, writer SN97 instead.</p> <p>For the MSFC NE00002, also modify the 'normal' print to the Personnel Laser printer to Class D, writer SN97.</p> <p>For KSC, switch the Personnel reports destination from Laser Printer (KSC,R014) to KSC-Xerox printer. Comment out the Payroll copy to R176 - they will use the personnel copy.</p> <p>Following ACI completion, by January 24, 2003 - revert all JCL back to original state.</p>			
20030005	Henninger, Linda	GRC	1/15/2003	Closed	1/21/2003	None	RC	Small		
Glenn Auto-CFC Process CA00024		Glenn Research Center would like to utilize the automated CA00024 Combined Federal Campaign (CFC) process within NPPS.					<p>A dataset will need to be provided with the format of SSN (A9), CFC-ORG (A9) (from the Glenn TCFC table, it's "CFC"), and CFC-DEDUCTION (N3.2). The dataset should be placed on the mainframe transient storage area with a name such as LEMOV.NPPSPP.CFC. The core BJS job CA00024 will be created for Glenn, using that dataset name and producing a resulting 6188 report to be sent to Glenn for validation. This will be sent to the primary MVSLERC1 printer.</p>

Title	Description		Recommended Action							
20020135	Wenger, Teresa	MSFC	11/6/2002	Closed	11/6/2002	None	RC	Small		
Emergency Data Modification - NECAPPI Error		The Production NECAPP1 job failed, in module NEB9710, on Nov. 6, 2002. The error was a 1305 on line 2060. The receiving field of a move/assign operation was not long enough to hold the result of the value. The fields in question were EMPL-BASIC-PAY-AMT and EMPLHS-PRVS-BASIC-PAY-AMT. Queries revealed that a HQ employee had transactions done in error, leaving an "annual" salary amount in fields coded for "daily" pay. The values were causing the excess value/error.					Query TRWTXAD was used to review employee data and to determine where the problem transaction records were. Assistance was provided from SESAAS to modify this data and allow processing to continue successfully. Consensus was received from Lou Nosenzo, to modify the transactions with the excessive dollar amounts and a PAY-BASIC-CODE of "PD" - daily - to "PA" - annual. This allowed NECAPP1 to run to completion, and the data will be manually adjusted when transferred to CAPPS.			
20020134	Wenger, Teresa	MSFC	11/1/2002	Closed	11/5/2002	None	RC	Small		
EE Bond and I-Bond Dataset Generations		Modify the Production BNDI and BNDE dataset generations to a total of 5, rather than the current 14. We previously maintained 14 pay periods' data in order to manually process the previous NASA Administrator's bonds, due to his monthly pay. That is no longer needed as the current Administrator is paid biweekly, with all other employees.					Reduce the generation data groups of BNDI and BNDE from 14 to 5. This will delete the old, unnecessary datasets and establish a maximum of 5 to be retained in the future.

Retirement Cards - TRANS-IN Money		An employee had TRANS-IN money for 2001. However, the amount was not shown on the printed retirement card, nor was it added to the accumulated amount. There was no money for 2002 and nothing was printed on the card, no date, no zero's, not anything. This was perhaps a state employee, based on the previous criteria we were given for State employees.					Determine the cause for the incorrect money amounts displayed on this retirement card, and modify modules, ensuring other TRANS-IN money is still displayed correctly.			
20020132	Walker, Sabrina	MSFC	10/28/2002	Approved	10/28/2002	None	RC	Small		
Retirement Cards - Multiple Line Action		The current Automated Retirement Code modules are currently "hard-coded" to force a newpage once 25 lines are filled on a page. However, occasionally the last action may require 2 lines to be displayed. Currently, that action would be divided between the pages. A multi-line action should be started at the top of a new page.					Have the code make a determination of the page's last action - if multi-line, force both lines to be printed on the following page.

Travel Manager - New Hires, Org Changes		The IFM Travel Manager system currently receives a biweekly update of employee information. There are some situations, however, when this update is not often enough. Often a newly hired employee is sent immediately on travel for NASA, or they travel during a reorganization or reassignment time.					Create a query that will list any new hires to MSFC. Also have a query, same or separate, that will list out organization assigned changes on active MSFC employees.			
		A query from NPPS that would be run between the current biweekly data refresh, listing new hires and employee organization changes, would be extremely helpful. It could print to U2613 in Rm 610.					Consideration needs to be given whether to query based on Mature Date or Effective Date, and whether to run daily or less often.			
							This will likely be needed for all Centers in the future.			
20020128	O'Rourke, William D	SSC	10/23/2002	Closed	11/13/2002	None	RC	Small		
SSC IFM Core Financial Integration Extract		Please run the NPPS/X.500 coordinated process for SSC data only, for the IFM Core Financial Integration Extract.					(Run IFMINT1 and IFMINT2 JCL members, using code NAB0043 & NAB0044.)			
		Provide the final dataset on the Transient Storage Pool as SSMOV.NPPSPP.IFMINT.FINAL.

GSFC 990 Personnel Actions			Goddard needs a one-time update of the Personnel Suspense file. In the past 4 different rating periods were used for the Perf. Ration Actions (990) - 3/31, 6/30, 9/30 & 12/31. Personnel would like to move to processing all with effective dates of 9/30. We would like to work with you on writing a program that will modify all of the 990 action effective dates to 20020930 on the Suspense file after we run the NE00003 job. In future years, the automatic Performance Generation Process should suspend all actions with the 9/30 effective dates.				GSFC technical support will create a tool to perform this function. The module/tool will be reviewed and tested in coordination with CPO technicals and GSFC and MSFC Personnel.				
							Perform in Production, only following successful testing runs.

Payroll Reports from U2615 to U0535		Three MSFC Payroll reports (203, 311R and 400), and the NASA 418 and 518 total pages, previously printed to the CPO printer U2615. This printer has quite often caused problems with successfully receiving the reports when they're most needed, early "Wednesday" mornings - due to paper jams, out of paper, etc.					Modify the JCL for MSFC's NA00203, NA0311R and NA00400, and the NASA CA00005 - to redirect the 5 noted reports to U0535 now, instead of U2615.			
		These reports would have a better chance of printing successfully to the newer, high-tech printer, U0535, with much more paper capacity and higher volume capacity. CPO requests a change.					Notify affected CPO personnel of the change.			
20020112	Wenger, Teresa	MSFC	10/2/2002	Closed	10/2/2002	None	RC	Small

20020097	Pizzarelle, Jim	HQ	9/10/2002	Closed	9/25/2002	None	RC	Small		
Biweekly Run of NASA Fiscal YTD 818 Report	Due to recent requirements this year, I would like to request that a Fiscal YTD 818 report for NASA be run each pay period and transmitted electronically to myself (only), in the same manner as the Biweekly 818 report is transmitted.		Consider best placement of this run. The biweekly 818 runs within job CA00004, with the report emailed to HQ and archived in ADOSS. Options are to (1) place the FYTD 818 run also within CA00004, or (2) place the FYTD 818 within CA00005, to avoid delaying that night's start of all other processing that relies on job CA00004 to "finish". Either option will create the report with a new, unique dataset name and will only email it to Jim Pizzarelle.							
			We do not want to have to run this as a separate job submittal - only adding to the manual steps on this processing evening.							
20020096	Pizzarelle, Jim	HQ	9/9/2002	Closed	9/10/2002	None	RC	Small		
Fiscal Year-to-Date 818 NASA Reports Requested	I would like to request the creation of an 818 Fiscal YTD report for each of the following pay periods, for NASA: 07/27/02 and 08/24/02. Please transmit these in electronic RTF format, in the same manner as the current biweekly reports are sent.		(CNPPS Tech. Support team will run a FYTD 818 report for NASA from backups of each of these pay periods - one was already in place in the Development database, the other was restored and the report recreated. Each report was transmitted electronically to Mr. Pizzarelle.)

2002 W2 Xerox Form			A 2002 W2 Xerox overly form must be created according to IRS regulations. Continue to maintain 1997, 1998, 1999, 2000, and 2001 forms. Joe Bogan will be the reponsible party for making these changes and testing with the PayCon team's software.							
20020078	Wenger, Teresa	MSFC	7/29/2002	Closed	9/13/2002	None	RC	Small		
CNPPS Implementation of Core Software Release 8.5			Implement per the VDD with special attention to details regarding the core AdminStar update and the L&E SSN suppression. The AdminStar jobs need to be greatly modified - the process will be improved by allowing TSO submits, and no more CPO unique setups. The L&E SSN suppression needs to be tested with Centers and the MSFC and KSC unique sort steps closely reviewed to ensure no problems with the final documents.  Also of note - 2 of the CRs with this release were worked in earlier CNPPS requests - the removal of reports 411, 412, 355 & 367 from BJS.							
			Implement required changes to Test - coordinate testing with CPO, MSFC Personnel and Centers. Implement required changes to Production the evening of September 11, 2002.  Key points of implementation - TOOLVRSN update, the 428 PF1 Help needs to be added, BJS changes for AdminStar, and there are three separate tools to be run on the data.

Scheduling/Submitting Multiple Center NA00203 Reports	With the implementation of WebTADS, each Center using the system needs to have their 203 (Leave & Pay Processing Information) ASAP on the morning after Job 4 is processed. The technical support team is currently running an NA00203 for each Center in WebTADS - individual Schedules and Submits for each. This night is a busy one, and we're trying to streamline the amount of work and effort needed, as much as possible, to help reduce the late hours and to reduce chance for errors. We want to investigate the possibility of having a single job that would run all needed NA00203s for given Centers when submitted.		Review the current process of NE00366s run for all 10 Centers within the CAEE014 daily job. A step within this job schedules all ten jobs (module AG4060X), later steps submit them each (with NPB4010). See if a similar job can be created to schedule given NA00203s and submit them.							
20020058	Wenger, Teresa	MSFC	6/10/2002	Closed	6/17/2002	None	RC	Small		
202 Payroll Register Totals Pages - Separate Run	Currently, the CPO Technical team is running individual jobs following Job 4 processing on Tuesday nights, to produce all Center total pages and Pay Block total pages for each Center. This began due to ADOSS issues, but continues for the great convenience to CPO - immediate availability of reports, avoidance of potential processing contention on the busy Wed. mornings if needed from NPPS, and avoidance of lengthy work in retrieving from ADOSS should it be extracted successfully.  The technical team has been looking for an improved method of handling these jobs, however, as they currently must be submitted as 10 individual jobs, each utilizing the &&MASTER step, run an hour on average from start to finish, causing contention with Job 4, and are difficult to carefully submit late at night or during the day to be placed on hold.		Analysis has been done to find an alternative, more efficient method of creating this output for CPO.  Create one, new process - CA202PB. This process can be scheduled with jobs CA00004 and CA00005 with a schedule number between theirs, so that all three will run in automatic, continuing sequence once scheduled and submitted. Parameter defaults will be set up for the steps of options D, then C with each pay block. (An NPPS has been submitted to fix the problem of PB numbers being cleared when the parameter screen is invoked.) One set of JCL will run 10 steps, plus the &&MASTER step. It will create one dataset that will have all total pages added to it - the Center totals, then the PB totals for PB's 1 through 9. All Centers will have to be chosen when it is scheduled. There will only be one banner at the beginning. Update UOG Appendix C.

Retirement Cards - TRANS-IN Money		The salary deduction on the automated retirement cards is incorrectly showing a cumulative amount for a 'transferred in' employee. The problem is a result of picking up the TRANS-IN money every time. It was asked for that to be done in the past - see referenced CNPPS CRs. Now the TRANS-IN money is picked up and added to the calendar year salary deductions. If an employee is not being paid by the state department, then the TRANS-IN money should only be added to the Accumulated Salary Deductions.					We need to distinguish between the State Department employees and regular employees. To make these cards successful for these employees, we must have the right criteria, if it's available, to identify the State Department employees.

KSC JCL - SYSOUT=Z			We've recently noticed that almost all of the KSC JCL members have lines of SYSOUT=Z at the beginning when their unique banner dataset is referred to. Our CNPPS JCL all has a MSGCLASS of A, and with these lines of SYSOUT=Z, a separate Job Output Element is being created, causing multiple Elements in the Job Output Log. If SYSOUT=* is used instead, the details are all included in a single Job Output Element. This will reduce the clutter in the NAPROD Job Output Log and keep an entire job output together - making the review of job runs much easier.				Scan all KSC JCL partitioned datasets for any "SYSOUT=Z" code and replace with "SYSOUT=*".

Retirement Cards - Reassignment Base Pay			An employee had an internal reassignment on 12/31/2000, and retired on 5/10/2002. On his retirement card, his current/final base pay was listed correctly at the end, but also in error next to the reassignment. This was a NOAC 721.				Analyze the problem with the retirement card regarding the reassignment and base pay amount display. Determine corrective action.

WebTADS TADATA Load Process for NPPS	A new process is required to load the files created from WebTADS for MSFC, ARC, KSC, SSC, and LaRC into NPPS. Each file will be placed on the NAADE28 server to be retrieved from the CPO technical team for processing on the normal schedule for Job 3. NOTE: When full center implementation has been completed from center legacy system to WebTADS the current load process must be modified to remove the load step in the current JCL member.		Two JCL members need to be created for implementation of the new requirements to load the TADATA files created from WebTADS. One JCL member (APCTAWGT) in agaoh.nppssp.webtads.bjsjcl will "GET" the files from NAADE28 and copy to a permanent dataset. As centers move to Pilot implementation this process will be modified for those centers. A second JCL member (APCTAWLD) will use the core program NAB5221 to reformat the data and load into NPPS. This member will also be modified as centers move to Pilot implementation. These jobs will be the last steps in the core TADATA process. This CNPPS 1620 will remain open until all centers are fully implemented. This process overwrites the data when loaded into the TADATA file on NPPS.

BJS Datasets from Cylinders to Tracks			All datasets used for loading Batch Job Scheduler information, for Centers in each Database, were originally allocated as Cylinders. The BJSRPT (report), BJSJOB (job) and BJSPRT (print) datasets, in particular, are much larger than needed.				Allocate the oversized datasets as Tracks, copy the original data to them, then delete the original datasets.			
			All of these should be re-allocated as Tracks, not Cylinders. There are 139 of these datasets. This will reduce the utilization of NAPROD space from 139 Cylinders to 10 Cylinders maximum!							
20020042	Barkley, Lynda	MSFC	5/13/2002	Closed	11/12/2002	None	RC	Small		
WebTADS EMPREC Jobs			Four EMPREC extracts need to be done to provide leave balances and attributes into the application WebTADS. Separate JCL members will be created with a number sequence of EMPREC 1 - EMPREC4 based on the CPO Timeline Schedule for WebTADS.				Create 4 separate JCL members using the core program NAB5223 to extract the date in an AGAOH high level permanent dataset. Each member will have an FTP step to NAADE28 server, including an IF statement and will use different file names for the EMPREC files. The JCL member will also contain an email notification to the development team that the file is available on NAADE28 for importing cd /home/webtads/p/npps. It will extract all 10 center data from NPPS and each center will be responsible for importing their own center data on WebTADS. These four members will be placed on CA7 scheduler with CPO approval.

Remove KSC Record from PERMAST			Please remove a duplicate record on Eric M. Haddox from NPPS PERMAST. He was erroneously entered in NPPS several years ago under the wrong SSN. Instead of simply correcting the SSN, he was entered in again with the correct SSN. (We then did a dummy separation on the employee with the bad SSN.) To make a long story short, he's been messing up some of our job labor data for quite awhile. The bad SSN has no history, but does have a master record. The good SSN should remain active in NPPS since the employee is still on-board.					Review the NPPS files for any place the "bad SSN" may exist, and remove.		
20020038	Wenger, Teresa	MSFC	5/7/2002	Closed	7/23/2002	None	RC	Small		
JCL File Allocations			There is some JCL in the CNPPS area that has been set up with datasets being allocated as DISP=(NEW,CATLG,CATLG). The last place in this statement signifies what will happen with the dataset in case of an error - in this case if the job errors, the dataset will stay Catalogued. A blatant problem with this was noted recently when a dataset was found, residing on NAPROD, that had been created in error in September 2000, is empty, but has been holding 100 cylinders the entire time. The JCL that created that dataset had this type of disposition.					Scan all JCL within CNPPS to search for any dispositions of "CATLG,CATLG" - change them to "CATLG,DELETE". In doing this, if any job errors, the space allocated will be deleted, it will not remain catalogued.  There are 48 PDSs of JCL to be scanned, modified and reloaded, as needed. There are 17 other PDSs to be scanned and modified, as needed.

CNPPS Implementation of Core Software Release 8.4		Implement per the VDD with special attention paid to details regarding the new Student Loan Repayment function and considerable coordination in testing and work with CPO, MSFC Personnel and all Centers. There are a great number of changes to the environment and to Production and test processing, due to this Release.				See the attached page for an overview of the items needing detailed work.				

All steps are to be done to each applicable environment or PDS - for Production, Test, Development, YearEnd, Emergency and WebTADS(34):

Implement Release into each Database:

- Install NPPS Software 8.4 into core library and copy into AGNPLIST (for Centers viewing)
- Install Data Glossary File.
- Predict update on Files 225, 226, 227.
- Update TOOLVRSN.
- Add SLR Command and run Security update module NPO1400.

Step for Personnel Mature Locks:

- Add step for NPB005 to CA00003 and CA00004 - modify JCL.

CAEE006 to send one (1) EE L&E dataset, rather than ten (10):

- Modify the CAEE006 NASA JCL to allocate and modify only one, much larger, combined dataset.
- Modify the PROC.LIB to transmit the single dataset to OPM, rather than ten (10) - test transmission.
- Delete all old .C10, .C21, .C22, etc. datasets that were previously created/used.
- Modify the CA7 job AGMIGRAT - previously migrated ten (10) datasets & should now migrate one (1).

New Report CA00205 for NASA:

- Create/Add JCL, JOB and RPT information for CA00205 on-request Report.
- Add steps for creation of Report 205 in Process CA00005 with print to U0075.
- It should also be archived to ADOSS:
  - Coordinate the new application build with ADOSS personnel.
  - Add to the ADOSSAJ5 CA7 job.

New Report NA00205 for Centers:

- Coordinate with all Centers - who wants this report?
- Create Report NA00205 JCL, JOB and RPT information for the following:
  - HQ - print to HQ printer, and add to NABWAJ5
  - DFRC - print to U2935, and add to NABWAJ5
  - SSC - print to N14JES2.RMT0, and send to ADOSS, and add to

-------	-----------	--------------	-----------------	--------	-------------	----------

Type	Size	Expected Release	Expected Release Date
------	------	------------------	-----------------------

### Recommended Action

NABWAJ5

- JSC - send to JSC Web
- KSC - print to KSC printer, and send to ADOSS, and add to

NABWAJ5

- NOTE: For each one going to ADOSS - coordinate this effort w/Center and NACC - for access.

Leave & Earnings Statement form/data change:

- Test with Centers following receipt of new Xerox overlay file for LE5, from SESAAS.
- Modify code and JCL for NAPR557 job - printing "old" L&Es on old form.
- Monitor L&E datasets - deletion of "old" 5, in 5 pay periods.

Modify JCL for ALL jobs (NASA, Noncon, all Centers) that utilize the &&MASTER temporary file - LRECL, BLKSIZE and SPACE have changed:

- Total of 14 CPO jobs.
- Total of 13 jobs each used by multiple Centers.

CPO Unique Jobs:

- 406 Unique - CA0H406
- Add two lines to core NAB406A, to use #HEADER field in maps.
- Modify TRW406A, TRW406B, TRW406C per NAB406A core changes.
- 201 Uniques - Batch and TSO jobs - four total:
- Modify AGB201 (nite auto run), AGB201AU (biweekly Audit report),

AGB201PP (full pay period report), & AGB201T (nite auto run) - per NAB201 core changes, add two lines to call SLR template.

Test Unloads of files 225, 226 & 227 for all Centers requesting it, who currently receive these files in regular unload processing.

Update UOG Appendix C.

Update On-Request Spreadsheet.

Update Payroll Processing Schedule.

HQ - CPO 328 - "FAST Report and Data"		Throughout the past few years, our CNPPS Technical Support team has run numerous database restores to recreate a NASA HQ site unique Cost Tape/dataset for the HQ "FAST" system, and its associated report. Most recently, one was run this week for 10/20/01 data, and one was run in February for 12/29/01 data. Since the inception of Payroll Consolidation, we have tried many times, unsuccessfully, to ask the HQ programmers to modify their JCL to create permanent datasets, rather than the temporary ones that are only available at run-time. We have also offered to modify their JCL for them. However, they have stated that a change for this must go through their formal CR process and they have not successfully accomplished this despite our many emails requesting it to be done, in some manner.								

Creating a permanent dataset, alone, will not actually resolve the problem we're seeing recently - where they need to go back not just to the last pay period when the report or data is lost, but back many pay periods. Thus a generation data group (GDG) would be the best resolution to this problem. I have basically given up hope that HQ will be able to remedy this themselves, so I am proposing a solution, following a few alternative considerations. We/CPO run the same set of code (we get updates from them when they modify it) to produce the report, only, for CPO and their required reporting. Since we run the same code each pay period, as HQ does - I had previously thought of having their job simply print a copy of the report to CPO - however if they ever forgot to run the job, then CPO is in trouble - and HQ can not run it on "Tue. nights" as we can for CPO, to aid their early morning work on Wed. Also considered, was to have our job create their data and transmit to them - similar problem on timing, we run ours late at night - also do not want us to be solely responsible for their transmissions. So - here's a compromise that I think may work out best for all of us...

I would like to modify our JCL, used to run this report for CPO, to now keep permanent GDGs of the report and Cost Tape dataset, for a period of 30 generations. Since we will be doing this as a preventive measure for future HQ's requested database restores, I would like to have the GDGs stored under HQ's high-level qualifier. (They only hold, maximum, one cylinder for each of the two items, each pay period.)

Study/Analysis on Military Deposit Retirement Cards	Currently, any employees who have Military Deposits, and retire - have to have their retirement cards created manually within CPO. Since all other retirement cards are automated, we'd like to explore the possibility of assisting in the area of Military Deposit Retirement Cards, also.		Do an analysis on the feasibility of creating "Military Deposit Retirement Cards" from NPPS, in a similar manner as current FERS and CSRS Retirement cards. Run queries to determine number of employees affected. Determine what data is housed within NPPS and how accurate or complete it is.  Meet with CPO, to present findings, ask additional questions, and discuss the feasibility/benefit of working Military Retirement Cards. If automated Retirement Cards aren't feasible, also consider if some type of new, small automated query/report would be helpful in monitoring these employees, in any way.

Title	Description						Recommended Action			
20020016	Lee, Julia	MSFC	1/2/2002	Closed	2/21/2002	None	RC	Small	Determine the problem with the site unique code AGB513 and AGB514 and modify to capture the 1st pay period of the year and print deduction and cumulative totals on CSRS and FERS retirement cards. Test code modifications and show customer SSNs used to correct the problem with before and after snap shots. When approved move into production environment.	
2002 Retirement Deduction Problem			Retirement deductions for 2002 did not print on the retirement records for PPE 12/29/01. The cards had to be manually typed with deduction and cumulative totals.							
20020015	Johnson, Karen C	MSFC	2/6/2002	Closed	2/6/2002	None	RC	Small	Run LUMPSU1 program in Production (DB129) library, AGNPINQ1 using the JCL member Natural in AGAOH.NPPSPP.JCLUTIL. Modify the program with date range 01/13/2001 through 01/12/2002 and the center date range (ie. 760020010113 thru 760020020112) each time when running for individual center. Print the 303 reports for each Center, from PPE 01-12-2002, from ADOSS.	
Agency Leave/Cost Data for OPM			OPM has requested the MSFC/CPO gather data to complete a worksheet on Leave Year 2001 Work Years and Personnel Costs. The memorandum requesting this is in the 1620 folder. The data for this can be obtained from the 303 reports and a previously created query.							
								Calculate the figures for "Attachment 5" of the document 0197-OPM-AN. The Sick Leave and Holiday Leave come straight from the 303's. The Annual Leave is the combination of Annual Leave, Restored Leave and the Lump Sum from the Query. The Annual Lump (1a) is from the query after the calculation is performed. The "Other Leave Covered by 5 U.S.C. 6301" is a combinition of ADM LV, Ct, CT:REL, COP, COURT LV, CREDIT, EXE LV, GTRD LV, HOME LV, JURY LV, MIL LV, AND TIM OFF FROM THE Lump Sum amounts from the LUMPSU1 queries. (Note, the LUMPS1 results are in hours and must be divided by 8 to get "days" to match the 303's.)

Updates to NPPS Files created for AdminSTAR Refresh			Some processing changes were made between the time the NPPS files were changed for the release of AdminSTAR 5.1 and the actual implementation of AdminSTAR 5.1. These changes need to be incorporated into the current extract of NPPS data for AdminSTAR. The value of the supervisor indicator and logpass fields need to be changed based on the value of the termination date field. When the termination date is null the supervisor indicator should be set to '1' and the logpass should be set to the value in the PER-NAMEFIRST field (this is what is currently done). When the termination data is not null the supervisor indicator should be set to '0' and the logpass should be set to the value in the termination date in the format MM:DD:YYYY HH:MI:SS.				Modify the NPPS modules to incorporate these changes. These changes need to be made to both the 4.5 and 5.1 processes. An e-mail will be sent to NPPS to notify them of this request with an updated ICD attached.			
20020003	Barkley, Lynda	LeRC	1/5/2002	Closed	4/5/2002	None	RC	Medium		
2001 Yearend Close-out			Final steps need to be taken once CPO is finished with all of the Year-end work - typically in late March.				* The database needs to have its final "2001 Yearend Adjustments" backup taken. (Garrett) * All critical "NPPSYE" YearEnd datasets should be renamed to NPPS01 for historical purposes and reprint requirements for 2001 W-2s. * The CPO unique 201 transaction report the the Agency yearend adjustments for period December 16, 2001 through final closeout will be converted to an Excel spreadsheet and provided to CPO and archived to ADOSS. * Final balancing reports will be provided to CPO.

ACI Mature Report Destinations		During annual ACI processing in January, the volume of printing of mature reports increases significantly. With the ten Centers' mature reports dual printing inside the CPO office on Laser printers, the destinations must be modified. Also, KSC and MSFC use small Laser printers and have a similar problem. The alternate printing should be set for the first morning of ACI processing until the time that each Center has completed during that pay period.					Immediately after Leave Yearend processing is complete - the evening of January 16, 2002: Modify all NE00002 jobs except for SSC and DFRC, to comment out the 'normal' CPO dual print steps and send the 358 & 359 reports to Class D, writer SN97 instead. For the MSFC NE00002, also modify the 'normal' print to the Personnel Laser printer to Class D, writer SN97. For KSC, switch the Personnel reports destination from Laser Printer (KSC,R014) to KSC-Xerox printer. Comment out the Payroll copy to R176 - they will use the personnel copy.  Following ACI completion, by January 26, 2002 - revert all JCL back to original state.			
20020001	Davis, Jacky	MSFC	1/3/2002	Closed	4/18/2002	Medium	RC	None		
New AdminSTAR Database Server		The AdminSTAR database is changing servers. We will need the current AdminSTAR 5.1 NPPS files that are created weekly on Wednesday to be transferred to AdminDB.msfc.nasa.gov instead of naade22.msfc.nasa.gov. We will not be able to keep the same directory name on the new server - it will change from home/admstar/data/imports to just data/imports. We need this change implemented with the Feb. 6th run. We would appreciate test files as soon as possible.  NOTE: This is the AdminSTAR 5.1 files only - AGAOH.NPPSPP.ADMSTAR.LEARNER, AGAOH.NPPSPP.ADMSTAR.ORG, AGAOH.NPPSPP.ADMSTAR.LOCATION (not the MSFC files).					Modify NPPS JCL to incorporate required changes for new servers.

Dryden Leave & Earnings - Xerox print onsite			Test and coordinate implementing printing the L&E statements onsite with target date of 2/9/02 cutover.				Coordinate printing L&E for PPE 1/26/02 and 2/09/02 with Paul Erickson @ DFRC. Modify JCL to reflect printer identification currently as /*OUTPUT DFRC Forms=LE4, DEST=HCCA.R2935, 1 Copy. Modify JCL members NA00556 and NA00557 with new printer requirements in production and test. Modify JCL member NAPR557 with prior L&E form name (LE3) and printer destination in production and test. Add Paul Erickson (Paul.Erickson@dfrc.nasa.gov) and Joe Ennie (Joe.Ennis@dfrc.nasa.gov) to CA00555. Coordinate with Kim Rogers to see if anything needs to be done with site unique program LEDRYDEN.			
20010165	Wenger, Teresa	LaRC	12/11/2001	Closed	12/18/2001	None	RC	Small		
Langley Incorrect SSN - Arena			Jonathan Arena, Langley, was initially entered into NPPS with the incorrect SSN. He began work on 9/12/00. It was recently discovered by Langley, that his records need to be switched to the correct SSN. (He did receive a W2 for 2000 with the incorrect SSN and he has been on the Quarterly Wage incoming dataset with an error.)				The NPPS software will be used as it allows possible, to move this employee's data from the incorrect SSN to the correct one. The remaining data that doesn't move with that method, will be moved/removed via ad hoc tools. Data remained in the system on the incorrect SSN for the PER-SUSPENSE and TX files - these are to be removed. The EE-MASTER record did not switch - it should be modified to correct SSN. And OPM/Employee Express should be notified to correct this SSN in their system.

JSC Report Binding & Distribution			<ul style="list-style-type: none"><li>* The metal binding on a report with assembly instructions of "DB" - Drill &amp; Bind - cut a JSC employee causing 7 stiches. So it is requested that all NPPS reports have their instructions changed from "DB" to "RB" - Rubber Band. With this instruction, holes are drilled, but they're bound by rubber bands not metal binders.</li><li>* Also remove all references to "Fiche" in the Distribution/Assembly details - Fiche is no longer used, these are being ignored.</li><li>* Also switch the distribution of report NE00351 from D. Kutchinski to S. Krzmarzick, Bldg 12, Room 105E, 1 copy, RB - Private Data.</li></ul>				Modify the JSC BJSRPT dataset which contains all binding and distribution details, accordingly - and reload to Production.				
20010155	Wenger, Teresa	MSFC	11/21/2001	Closed	4/18/2002	None	RC	Small			
EE Incoming File LRECL Modification			The daily files transmitted from OPM to NASA have changed in record length from 1065 to 1120. It is a requirement for our file to change accordingly to allow a successful NDM transfer of the file - new transmittal method now in place, effective 11/21/01.				Reallocate the AGAOH.NPPSPP.EETRANS.OPM dataset to match the new LRECL of 1120 - BLKSIZE of 11200.				
							Also modify the JCL which copies this dataset to a GDG backup (now in the CAEE014 JCL).

New 420 Breakdown Query - Headcount Semi-Annual			The core 420 report for CSRS Grand Totals, reports a field "Civil Service Credit" for Retirement Codes 1 & 4 and for FERS Grand Totals, a field "Salary Offset" for Retirement Code K. A breakdown is desired to show which SSNs and amounts go into these Grand Totals. This will be run twice a year at the same time as the current "Headcount" queries.				Analyze NAB420 to determine how these two fields, Civil Service Credit and Salary Offset are calculated. Provide a query report to list SSNs and amounts at the individual level.

20010152	Wenger, Teresa	MSFC	11/16/2001	Closed	11/16/2001	None	RC	Small		
Daily EE File Space Allocation		The daily incoming EE file has always been allocated in the past as a (TRK, (1,1)) - meaning it allocated one track at a time and would max out at 10 tracks total, then error. This has not been a problem in the past, however on 11/16, the total number of incoming transactions hit an all-time high of over 400. A total of 9 tracks were allocated - extremely close to our limit. We must increase the potential space allocation to prevent errors with the incoming file.					Modify the incoming file to be (TRK, (3,3), RLSE) - so that an initial set of 3 tracks are allocated, followed by a potential for 10 sets of 3 after that - 33 max. This will accommodate an estimate of over 1500 incoming daily transactions.			
							The file AGAOH.NPPSPP.EETRANS.OPM needs to be reallocated. The step copying that file to a GDG should also be set to the new allocation.			
20010151	Wenger, Teresa	GSFC	11/15/2001	Closed	11/19/2001	None	RC	Small		
Incorrect SSN - Leslee Cork		A GSFC employee was erroneously added to NPPS with an incorrect SSN in the Fall of 2000. For yearend processing of 2000, the information on the SSN in error was manually removed from external datasets for W2 and SSA reporting. The record was never corrected however, within NPPS Production. This employee's record was partially corrected in that the incorrect SSN was changed to duty-status = "Z". The employee is also in the system under her correct SSN, and is being paid under that SSN.					A similar situation was just completed with CNPPS CR 20010139 - regarding another employee. The tool used to remedy that situation may be used with this one, as it has been determined that a clean removal of the employee's data under the incorrect SSN will resolve the situation.			
							Module TRW10151 has been created to remove this SSN.

Personnel Action Loop/Inactivity Trap		Per NPPS Cr 20010006, SESAAS has modified module NEO1110L and provided a copy to us. This is in an effort to stop personnel suspense action loops that have been happening sporadically but frequently in Production. We have asked Personnel users to access TEST, running any types of personnel processing. We need to confirm that this code change will not affect other tasks, and if a loop is hit, we can confirm it stops as we want it to. If testing goes well throughout a month or more, we will ask for concurrence to move this code change to Production, to make the loops stop there, soon after they occur. The timer is initially set for 60 seconds - upon hitting a loop or becoming inactive on the Personnel Action screens, the user will be kicked out of NPPS, not NAPROD. At that time, we can look at the results of the loop, with Command Logging in place on the database, and the user will be immediately able to get back into the system. Their work will still be lost, as this does not prevent the loop - but it will, at least, stop it from becoming lengthy and costly.					This modified module has been placed into the CNPPS TEST database, as of October 4, 2001, and are monitoring test results done by Centers. Code modifications will be made as testing progresses.			
							Concurrence will be obtained from ERB, before this module is placed into Production - ensuring adequate testing has been done, and ERB and affected users are comfortable with what the results have been/will be in the Production environment. The key items to be noted will be affects on all aspects of Personnel processing, and the length of the Loop/Inactivity timer.			
20010127	Wenger, Teresa	MSFC	10/1/2001	Withdrawn	5/29/2002	None	RC	Medium		
Retirement Cards - Correct Order based on Effective Date		Currently, transactions for the same effective date, are not written to history in the correct sequence per regulation - example a NOAC 702 should list prior to a NOAC 292. In order to correct this, SESAAS will be modifying core modules to to a DESC (descening) sort. We will need to first of all, request NACC to modify SAG within NAPROD to allow a DESC sort - an option not currently available. Then we will need to modify the Automated Retirement Card modules accordingly, to use the INSTALL-SSN-MATURE-CMPLMNT from NPS2-PER-HISTORY with a DESC sort.					Request given to NACC on 10/1/01 to enter a CR in their system for a SAG upgrade on NAPROD allowing the use of DESC.			
							Work the needed retirement card code changes prior to and following the future Core Software Release, regarding the use of the listed superdescriptor with a descending sort.

Production Implementation of Travel Manager		<p>Per the NPPS CR 20010025, work is being done for the Core implementation of the Travel Manager Interface. Pilot tests were done via CNPPS CR 20010041.</p> <p>Per NASA, Langley and Marshall, a baseline point has been reached, and all are ready for Production implementation. The modules will be released via a Core NPPS Software Release in the near future, until then this CNPPS CR will cover the immediate implementation to Production.</p>					<p>The most recent, baselined modules have been received from SESAAS - NAB7133T and NAB7133X, and placed in the Core Production library, AGNPPROD. TSO JCL members will be run via CA7 to run each of the interface steps, with NAB7133X run first, sending a file for X.500 to update and send back. The second step is then run, NAB7133T, to incorporate further NPPS details with that X.500 file, and transmitting to Langley. There will be a two and a half hour delay between these two jobs to allow the X.500 piece to run.</p> <p>The runs will originate with MSFC and Langley data, other Centers will be added, JCL modified, per future CNPPS CRs.</p>

Fiscal Yearend Processing within NPPS	Document all Fiscal Year End processing "unique" steps in one CR in future years, combine notes on all here, for FYE 2001. Those already written this year were 20010115 and 20010117. A significant change was made this year in the order in which the FYE Job CA00015 is processed - future years will follow this order. The tasks are as follows: (a) Create processing schedule for Centers & CPO to use, a second for Techs to use; (b) determine if the Appropriation code will be changed for Core TINSTALL tables or any unique modules; (c) ensure Centers run their NA426s, then run ADOSS426 to transmit for CPO, also print to Nancy Harris, HQ; (d) transfer NASA 420 report data to Excel for CPO; (e) run FYE 818, email to HQ Code M Jim Pizarelle, and transmit to ADOSS; (f) run CA304 for each Center-goes to ADOSS; (g) manually update the TMILINT table after Job 9 per FY2002 rqmnt; (h) Process CA00015 in new order - see below.		Steps are listed on the "FYE Process Schedule - Tech Notes" which is used for Production running of tasks surrounding Fiscal YE. Ensure each is carried out to completion and notes are kept on any changes.  The order of processing CA00015 has changed as follows - based on testing done the Summer of 2001, and due to Release 8.2 involving Military Leave updates: (1) CABAKUP - once a year production job/tool to simply take a backup easily used by Tech team - will store with name NA15BEG, to coincide with other FYE annual backups - notes on this in folder; (2) CA00006 as usual; (3) CA00015 with no backup, updates Military Leave; (4) Update TMILINT; (4) CA00009. (Any software or table releases will be timed accordingly in this set of steps.

NASA 818 for HQ Code M	Barbara Manthos and Jim Pizarelle receive printed copies of the NASA 818 reports each pay period from job CA00004. We've heard of the electronic version available and would like to receive our copy this way. It will reduce delays in printed copy distribution and reduce hard copy storage. Finding information within the report will also be more convenient.		Please transmit future biweekly NASA 818 reports to us via email attachments.  (A previous CR had been written and withdrawn requesting the data in spreadsheet format - we understand that's not possible, but this electronic RTF version will still be a big help.)

Dual datasets are needed in the weekly extract of AdminSTAR data.		Our AdminSTAR POCs have added a significant requirement to our AdminSTAR 5.1 release (with the same October 5th deadline). The 5.1 version of AdminSTAR will be implemented at all the NASA centers except MSFC. MSFC is keeping the current version of AdminSTAR.					We would like to keep the current file names for the new way: AGAOH.NPPSPP.ADMSTAR.LEARNER AGAOH.NPPSPP.ADMSTAR.ORG AGAOH.NPPSPP.ADMSTAR.LOCATION (new file)			
		Eventually MSFC will be implementing the 5.1 version of AdminSTAR but until they do we will need to update AdminSTAR with NPPS data twice every week - once the current way (for MSFC) and once the new way (for all the other centers). Which means that we will need to get two sets of files from Becky every week.					And add an MSFC node to the file names for the current process: AGAOH.NPPSPP.ADMSTAR.LEARNER.MSFC AGAOH.NPPSPP.ADMSTAR.ORG.MSFC AGAOH.NPPSPP.NASA.CA27QRY (no change - not in 5.1)			
20010119	Wenger, Teresa	MSFC	9/14/2001	Closed	9/18/2001	None	RC	Small		
BJS Substitutions of JCL		Currently, core module NPB4010 scans JCL for given strings and substitutes as needed. One of the substitutions, is causing a problem with our new technology of being able to email files as attachments from NPPS. All substitutions in NPB4010 looking for EXEC have a space on either side of the string, except one substitution. The term EXEC will always have spaces on either side in JCL, when used as an executable line-start of a step - as the NPB4010 intends to find. But a line in the emailing of files has a statement of SYSEXEC. This one line in error in NPB4010 is substituting in error on this line & does not allow the email of the file to complete successfully - the job actually errors with a JCL error.					A Core NPPS 1620 has been submitted to have the core module modified to place spaces around EXEC on line 5650 of NPB4010. However, we would like to make this change in the Production NPPS environment until that change is implemented, to allow us to email files as attachments. The need has already been identified - for non-privacy act reports.			
							We also have one tool that does the same thing in error - TOOL923 which is used to "dump" JCL from the database to a PDS also looks for "EXEC" rather than " EXEC ". Modify line 1440 of TOOL923.

201 Audit Report - CPO Unique		<p>For Audit purposes, an improved 201 report would be extremely useful. Currently the 201 reports for the full pay period (CPO Unique code AGB201PP) sort by Center, Payblock, SSN. When looking for work done by a specific clerk, the ADOSS report must have "Find"s done on it, and individual pages printed, one by one.</p> <p>The report would be very helpful in audit situations if a new one were available, sorted as follows: Cler, Template/Screen, Center, SSN.</p>								
		<p>Create a module AGB201AU, that will sort as requested. Since not sorted by Center, a two-character identifier on each transaction would clarify the data - example, by the SSN place "HQ" for HQ employees, etc.</p> <p>Have this new report run, consolidated, biweekly, and placed in ADOSS under a title such as "201 Audit Report".</p>								
20010103	Humbolt, Cheryl	HQ	7/27/2001	Closed	8/29/2001	None	RC	Small		
Query for HQ - "Exposure Hours"		<p>We need, for HQ employees, a biweekly query displaying in summary fashion at division level (single letter codes), the following data - excluding experts and consultants: Base number of hours worked, and count of employees; Overtime hours worked, and count of employees; Annual leave hours used, and count of employees; Sick leave hours used, and count of employees. Also provide Center totals on each. We would like this as soon as possible, to be run for each pay period, and also if possible, to recreate the data for pay period #7 forward - data which was missed. The HQ technical staff can not support us with this request.</p>								
		<p>Create a query providing the requested report results - printing, or using new email option, to Ms. Humbolt each pay period - Wed. mornings at 8am - run by CA7. Recreate the historic reports from history, as time and accurate reporting allows.</p> <p>Experts/Consultants are pay-plans ED, EF and EH. "Base hours" are same as those calculated for L&amp;Es, minus Annual Leave and Sick Leave, as they're totalled separately.</p> <p>If the HQ Center Safety officer, John Mullins, Code QS, is satisfied with the report/results - a request may follow for Agency totals.</p>

NDM transmissions with OPM			Currently data is transmitted to/from the Office of Personnel Management (OPM) for Employee Express (EE) via File Transfer Protocol (FTP). In order to accommodate larger files that are to be used for EE Leave & Earnings data, the option of Network Data Mover (NDM) has been reviewed. It is an option to use NDM via Connect:Direct - a direct connection from NASA to OPM via the Treasury - government lines. This will improve security and processing efficiency.				Modify EE daily and biweekly jobs - both the "master file" and soon-to-be-production "L&E" files, to use NDM as the transfer method to and from OPM.

Account Codes for NAPROD		The NACC is implementing account code standardization and improved chargeback methods for Centers. The system has been placed into a "Warning Mode" for an undetermined period of time. During this, all jobs that do not have a valid account code per a predetermined list, will be given an error message. They will not fail until this is moved from "Warning Mode" to Production mode. Logons will be halted until the correct code is provided - needing a call to the Help Desk. In order to ensure this is done accurately, we need to have all account codes verified and modified as needed for NAPROD IDs, review and modify as needed all JCL for core jobs and technical tools, coordinate reviews for Center JCL, and review other processes using account codes at run-time - such as SuperNatural transactions and the CPO AGNPINQ1 library.					Coordinate ID and JCL review with Centers and PayCon team.			
							Modify and reload all batch JCL as needed. Modify NAPROD ID account code information in coordination with NACC team.			
							All of this work will be completed, prior to "Warning Mode" being lifted - which will then cause jobs to fail with invalid account codes.			
20010095	Burleson, Jan B	MSFC	7/26/2001	Closed	8/24/2001	None	RC	Small		
AdminStar Modifications - Urgent Need		On the AdminStar Release 5.1 Learner file specifications - previously, a termination date if zeroes, was to have the field preceeded with a space. Now this space is no longer wanted, and it should have an additional tilde '~' after the field, regardless of its content.					Make modificationsn to RLBAS01X to accomplish both requirements.

NPPS 8.1.2 Emergency Release #1 (7/16/01) Implementation		This Emergency Release is to remove State Tax Codes from Awards in the system, for States not listed in the TTAX file. A change was made in Release 8.1 to no longer allow the entry of States not on TTAX for new awards, however if an award was entered for a person with a previous award with a bad State, that State code couldn't be blanked out.					Run the tool on Test data & review results with CPO.			
		Test and implement the tool provided as the Release, in coordination with CPO.					It's been found that State Codes for NJ and GA must be all excluded in a special IF statement, along with MD. Modify the NPTL0041 code, accordingly. Also modify the tool to display those awards being changed - with the State, Center, SSN and Award Payment Date.			
							Run the tool and provide results to CPO.			
20010091	Wenger, Teresa	MSFC	7/18/2001	Closed	7/24/2001	None	RC	Small		
Biweekly Bond Refund Query Modification		The Bond Refund report that runs biweekly at 7am following Job 3 processing, has been missing employees who are at that time in an "error" status with their timecard. The query was looking at the PAY-CUR-DOL(32) field. The query should be modified to read the 10 occurrences of the PAY-BOND-REFUND field instead. This will capture all amounts for all employees, regardless of timecard status.					Modify the SLWBOND query to pull the alternate fields and total all 10 occurrences, displaying just the total. Also add the field of Payblock to the report results.			
							Rename the query to AGPBOND for configuration purposes. This resides in the AGNPUTIL library.			
							Modify the JCL, BONDRFND, accordingly and have it reloaded to the CA7 scheduler.

Printing Retirement Cards Inside Consolidated Payroll Office		<p>Currently, the non-consolidated jobs for FERS and CSRS retirement cards - CA00513 and CA00514 - print to building 4201, on the official cardstock. Due to this, it can take a day for the cards to then be delivered to CPO for their review. This is OK for the biweekly runs of those actually retiring, and for other requests when they're needed on the official paper - but there are also many times that the retirement card information is requested for a quick review by CPO. At these times, the delay of a day is time consuming and frustrating. Alternate jobs that would be readily available for CPO to schedule and submit, that would print the retirement cards to a printer within CPO, would be beneficial - without having to call the technical team for a load of different JCL, then replacing it when the work is done.</p> <p>Create two new BJS options in the non-consolidated group, that will meet the above requirements - perhaps CA0513P and CA0514P. These two jobs should create the retirement cards as usual, however print them to the CPO printer U0535. The JCL/JOB/RPT pieces each need to be created, tested and loaded to production and each test environment. Also include a pop-up that will explain to the user that this job will print to the CPO printer. The descriptions in the Report List of the two existing and the two new JOBS should be helpful to the user to distinguish between them.</p> <p>Update the UOG, Appendix C.</p>

Batch Job for Financial Institution Query			We currently have access to a monthly update of the Financial Organization Master File from the Treasury at Hyattsville, MD. Per the recent decision to withdraw NPPS 1620 20000130 (inocporating the details into the core TFIN table), we now have a request from CPO to utilize the data in a simpler manner.				Create a batch NPPS job, under NASA, that will access the most recent generation of the AGAOH.NPPSPP.FOMF file, reading by the routing number, then producing and printing at the U0535 printer a resulting report. Job name may be CA0FOMF. All JCL/JOB/RPT information will need to be created, tested and loaded to Production.				
			CPO would like a batch job option that they may submit, entering the parameter of a Financial Institution routing number, that will then produce a report giving the name and address of that given institution.				Update UOG Appendix C with this new job and details regarding it.				
							Create a CA7 job that will automatically retrieve the monthly FOMF file on approximately the 5th of each month, and place it as a new generation dataset.

SAG Upgrade - RECFM=FBA vs. FB		With the upcoming upgrade of Software AG products (Natural 3.1.3), a change going into effect will cause an adverse reaction in our JCL if changes are not made. Prior to the upgrade, if we had RECFM=FB in our JCL for reports, the system automatically detected that these were reports due to the CMPRTxx label and changed the RECFM to FBA. With the upgrade, that auto-change will not happen. And without a RECFM=FBA, the reports will not print correctly as the print control characters will be in the wrong column and won't be recognized as page breaks, double-spaces, etc.					Modify ALL JCL to change the RECFM to FBA on every CMPRTxx step. This affects print files only.			
							This change can be done, and will run successfully, prior to the Software AG upgrade (currently planned for June 9th).			
							Inform all Centers of same changes needed to their JCL.

TRANS-IN Money on Retirement Cards	<p>Per the referenced CNPPS 1620, the retirement cards were recently modified to read and print the trans-in money for employees who are transferring within the agency, based on the noac code of 721a. We now need to re-write the code to look at the trans-in fields everytime. There are employees at some centers, who are actually paid by the state department and after that tour is finished the retirement money is deposited into the npps fers-trans-in or csrs-trans-in field. When the employee resigns, retires or terminates, the card is not showing the transferred money.</p>		<p>Analyze the code and modify to look for TRANS IN money for (all) employees, adding it to the YTD amount on cards.</p>

20010040	Walker, Sabrina	MSFC	3/16/2001	Closed	3/21/2001	None	DR	Medium		
Transferring and Retiring in the Same Year	<p>When an employee transfers from one center to another, the retirement card and retirement money follows the employee. The gaining center enters the retirement money in the TRANS IN field on the RETIRADJ screen. At Pay Year End, the TRANS IN money is automatically moved to the Prior Year Carry Over (PYCO) field. The retirement card modules (for both FERS and CSRS) read the PYCO field along with the YTD fields, to produce the Cumulative retirement money. The TRANS IN fields are not read.</p> <p>This poses a problem in the automated retirement system when an employee retires in the same Pay Year that they transferred between Centers. With the code not reading the TRANS IN fields, any retirement card that is printed for an employee that has recently transferred in will be incorrect, lacking the transferred money.</p>		Analyze the code and modify to look for TRANS IN money for employees, adding it to the YTD amount on cards.							
20010039	Wenger, Teresa	MSFC	3/14/2001	Closed	8/24/2001	None	DR	Medium		
EE Transaction Counts Report - FEHB Details	<p>The biweekly EE transaction count report, provided originally to Ames, but then via spreadsheet to Terri Robinson (ref: CNPPS 20010008), has not provided correct information on FEHB transactions. Many are processed through the Personnel side of NPPS, and appropriate files have not been queried.</p>		Determine correct method of gathering FEHB transaction counts and modify the AGEERPT module as needed. Recreate past Fiscal Year reports as possible.

Tool for FEHB Code Deletions		Agency Personnel users could use a tool to more efficiently check if there are any active employees, at any Center, in a given FEHB code. Periodically they have a large exercise of looking for FEHB codes that are about to be deleted from the system. Currently a SuperNatural query is used to find a small number at a time - time-consuming and cumbersome.					We can create a tool that will look for an indefinite number of codes in one shot & provide them a listing of who's still in which codes, from which Centers. (SSN, FEHB Code, Center) When it's time for this work to be done, they could provide us a list of codes to be deleted, which our tool will use to search the system for.			
20010037	Barkley, Lynda	MSFC	3/1/2001	Closed	3/15/2001	None	RC	Small		
Quarterly SSA Reports		Per CPO request, the SSA reports should be created Quarterly. The most efficient manner of doing this will be to add the production of the SSA reports 508/509 to the quarterly NASA job - CAQTNAS.					Modify the JCL of CAQTNAS to also submit the CA00508 for all 10 NASA Centers - which will print both the 508 and the 509 to CPO. Check parameter defaults and print destination.

FTP's w/EXITs and Emails w/IF-THEN-ELSE			In the past, we have been unable to tell if an FTP to ADOSS, OPM or elsewhere within NAPROD failed - other than to manually open the Job Output Log and review it for a successful transmission and FTP closure. In working with NACC, we have found a way to make all of our FTP jobs much more efficient - test runs have been successful. We can now have the JCL flag FTP failures with a Return Code of our choice, then we can incorporate more sophisticated email steps based on the FTP step success or failure.				A sample of the modified FTP line: //FTP358 EXEC PGM=FTP,PARM='(EXIT=02 TRANSLATE ADOSS' REGION=2048K Following steps can then check the FTP steps and send emails, or perform other steps, based on its success or failure. A key focus will be email steps - informing our team if failure, or the ADOSS administrator if successful. Sample: // IF FTP358.RC = 0 AND FTP359.RC = 0 THEN //SENDMAIL EXEC PGM=IEBGENER (followed by email steps for successful FTP-----) : // ELSE //SENDMAIL EXEC PGM=IEBGENER (followed by email steps for a failed FTP-----)			
			Modify ALL NPPS batch and TSO-submitted jobs containing FTP steps to place an EXIT on them, giving us a Return Code of '02' that we can then have the following steps react to.							
20010035	Wenger, Teresa	MSFC	2/27/2001	Closed	3/2/2001	None	None	None		
NEBA Tools			A pair of queries are run each pay period to check for employees at any Center who have either a NEBA Basic coverage dollar amount or a NEBA Optional coverage dollar amount, but neither of those options chosen. The results of these queries are provided to JSC and to SESAAS for monitoring of this previously-documented NEBA situation.				Modify and/or consolidate J5BASAMT and J5OPTAMT in AGNPUTIL to run more efficiently than the current method of running each on-line, once each for all 10 Centers and changing the Center code. Having it run in batch via TSO would be beneficial.			
			The current method of running the queries has been too time-consuming and inefficient.

SF52 Printer Options			Langley Personnel would like to be able to select multiple printers to print the SF52s - currently only one is used, RM76, with no alternates. They would like to have R65 available as another printer option, through the BJS.				Add RM76 and R65 to the Langley BJS Print Directory, and implement "printer-on-the-fly" for the SF52 JCL, JOB and RPT Directories, with RM76 as the default.			
20010027	Johnson, Karen C	MSFC	2/16/2001	Closed	3/12/2001	None	RC	Small		
MSFC L&Es for Off-Site Employees			Currently the MSFC L&Es must be searched through to find the Center off-site employees, to have the L&Es mailed directly to them. These employees' L&Es are amongst all other employees', sorted by their Organizations. The effort of searching for them, when sometimes the Org the others are sorted by is not accurately reflected for these off-site employees (thus they are not easily found & the full stack must be checked), is time-consuming & frustrating (over an hour last pay period).				If these Off-Site employees' L&Es could be grouped together & placed either at the front of the stack, or at the end - the effort of finding them would be all but eliminated. They have a common thread of the characters OFF in positions 3-5 of the field PAY-T-A-DIST-CODE. This code is also displayed on the L&Es and so is in the dataset that can be/is used for sorting.			
							Utilize logic similar to how KSC has been doing their unique sort, via a site unique module. Read the MSFC LES dataset looking for the "OFF"-site employees and change the sort-only variable on the LES dataset for them, to something unique that will place them at the top of the sort. This module will be run in the NA556 JCL stream.

Agency Leave/Cost Data for OPM		OPM has requested that MSFC/CPO gather data to complete a worksheet on Leave Year 2000 Work Years and Personnel Costs. The memo requesting this is in the 1620 folder. The data for this can be obtained from 303 reports and a previously created query.					Run LUMPSU1 in library AGNPINQ1 with the date range (leave year 2000) of 1/15/2000 through 1/13/2001. Print the 303 reports for each Center, from PPE 1/13/2001, from ADOSS.  Calculate the figures for "Attachment 5" of the document 0197-OPM-AN. The Sick Leave and Holiday Leave come straight from the 303s. The Annual Leave is the combination of Annual Leave and Restored Leave on the 303s. The "Other Leave Covered by 5 U.S.C. 6301" is a combination of ADM LV, CT, CT: REL, COP, COURT LV, CREDIT, EXC LV, GTRD LV, HOME LV, JURY LV, MIL LV and TIM OFF from the 303s, and the Lump Sum amounts from the LUMPSU1 queries. (Note, the LUMPSU1 results are in hours and must be divided by 8 to get "days" to match the 303s.)

SSC Quarterly Leave Query Modification	A quarterly spreadsheet has been provided by the CNPPS team to SSC since mid-1999. It has been discovered now, however that the data is not as we'd prefer. Currently the quarterly totals are including all leave taken by SSC employees - including those who transferred in from other Centers, and excluding SSC employees who transferred out, during the quarter. We'd like to have included the actual amounts taken by employees, while at SSC, irregardless of when they transfer in/out.		The query is currently reading the YTD totals as they exist for active SSC employees as of the last pay period of the quarter. Instead, the query should read by pay period, the leave taken the pay period for active SSC employees. This will remedy the problem with employees transferring in or out of the Center. Modify the query to read BW totals and calculate them together for Center/Organization totals in the requested categories. They should accumulate throughout the year, so that the 1st quarter query result is for the 1st quarter only (calendar), but the 2nd quarter's results will be for the combination of 1st & 2nd quarters, etc.

358 & 359 Reports to ADOSS Once per Pay Period			We currently send all Center Personnel Mature reports (358 & 359) to ADOSS, where they are individually extracted by the Administrator and archived with indexes. This has been around 60-100 reports handled one-by-one each pay period by the PayCon technician and the ADOSS Administrator. And CPO when viewing, has to look at 10-20 individual report for each Center, each pay period when looking back in time for data. We need to streamline the process by sending a single "report" of each 358/359 to ADOSS, per Center, per pay period - FTP all GDG generations of each report for a Center, as one concatenated "report" file, and have it indexed in an improved manner within ADOSS. All reports for the pay period for the Center will be in this single file, following each other in time order, but will still be viewed as, example, pages 1-20 for the 1st report, pages 1-32 for the 2nd report, pages 1-5 for the 3rd, etc. A single search will look through all, however, with this change.				(1) Increase the GDG base for the 358s and 359s to a max total of 15 generations - several Centers overran the current max of 10 during ACI this year. {Rest of the steps are to be done every other "payweek Wednesday"}: (2) Change the "as of" date on the first page of the first report - to be the pay period ending date, the date the users are most used to & would like to see. (3) ADOSSNE jobs will be modified to submit one job for each of the 10 centers that will send the ADOSS administrator one file for each the 358 & 359, containing all reports they ran that period. {A concatenation step must be added prior to the FTP step.} (4) Administrator will (as usual) need to manually extract them to ADOSS on that day. (ADOSS Administrator says the banner pages will be removed or left alone, without affecting the data in the reports, and that users can search that file in ADOSS, in effect searching all 8 or so individual reports, at once.) (5) PayCon technican will confirm they're in ADOSS OK, and can then delete them out of the way for work to begin again on Thursday by Centers.

DASD Resource Utilization	In reviewing DASD utilization of CNPPS data, associated costs and risks vs. benefits, it has been determined that a set of our largest datasets would be best "rolled off to tape" following payroll initialization. These datasets are either transmitted to ADOSS, copied to a CAPPs dataset or rarely viewed. By rolling to tape, they're not lost, still available with an HRECALL, but not left on DASD, utilizing precious space.		Create a JCL member in AGAOH.NPPSPP.SCHED.MASTER called AGMIGRAT, that can be placed on CA7 each Thursday morning at 6am following payroll processing to perform this need. It will, in batch, migrate the following datasets to tape: AGAOH.NPPSPP.C*.NA200A (for each of the 10 Centers'), AGAOH.NPPSPP.CNASA.NA202, AGAOH.NPPSPP.CNASA.STS, and AGAOH.NPPSPP.CNASA.NA418. These datasets total an average of 1218 cylinders or 1.03 Gig of space.

Payroll History Files Updated Erroneously	Error occurred with the history update step inside Job 4 - it uses only the pay period number, and the calendar year of the pay period ending date, for its superdescriptors. We had two PP#1s with calendar ending year of 2000 - the 12/30/00 data overwrote ppe 1/1/00 data in payhist-one and payhist-two. The original NPPS code was designed to accept only one pay period # per calendar year ending date. SESAAS will work to expand the superdescriptor to use the full pay period ending date, rather than just the pay period ending date's year. This will cause an expansion in the following superdescriptors: PAY-ONE-INST-YR-PP-SSN in NPS2-PAYHIST-ONE PAY-TWO-INST-YR-PP-SSN in NPS2-PAYHIST-TWO		Coordinate with Production NPPS users - informing of the halt of Production work until resolution is reached and code corrected. Implement emergency releases and point release as soon as received from SESAAS. Restore and rerun all necessary jobs and any reports/jobs needed for verification purposes, for Centers and CPO. Work with Center technicals to ensure they implement the same predict changes in their environments, and modify all affected code to utilize the new predict when installed.

Date on Incoming T&A Datasets	A problem that has occurred twice in the past, requiring Job 3 to be rerun in production, is having been provided a previous pay period's T&A flat file, rather than the current one. There is no method in place for us to check the effective pay period of the T&A data flat file we are sent - no date fields exist on the file. We need a method for us to know the pay period that the T&A flat files are effective for. There needs to be a date on the files that our code, when preparing to load it, will check against production's current pay period - on the CTLPAY - for the Center. This will require a modification to the T&A file layout.		Coordinate with the 10 Centers to have their incoming T&A datasets now include a "header record" as the first record on the flat file as follows: #HEADER-RECORD (A79) consisting of #CENTER-ID (A4), #PAY-ENDING-DATE (A8) in YYYYMMDD format, and #FILLER (A67).  The code in the CPO unique load process, module APCTAUP in AGNPUTIL, will be modified to compare the date in each of the header records against the Pay Ending Date in the NPS2-PAYCTL-TABLE. If the dates differ, the job should stop, displaying an error message.

W2 Address Letters' Address for Distributing		For next year, Fall 2001, it would be helpful for some of the Centers, to have the employees' mailing address printed on the back of the letter used to confirm the address for W2 purposes. These letters are either delivered internally at Centers, or sent through the US Postal Service. For distributing through the USPS, it would be very beneficial to have an address on the back of the letter, that will fold appropriately into a NASA window envelope, for mailing. Mimic the layout of the L&E addresses for mailing.					Prior to Fall, 2001, modify the code for the W2 address letters to include the mailing address on the back side.

EE/Paper Usage Query for CPO		Per the reference 1620, a query has been run biweekly for Ames to report on Employee Express usage versus "paper" transactions of the same type. First of all, the Bond and Bond-owner information needs to be added to this query. Then, for CPO usage, a fiscal ytd count of transactions/types/centers would be helpful.					Modify ARCEERPT to add the counts for BOND and BOWN transactions.			
							Coordinate a change of timing of this query to Wednesdays of pay-processing week, at 3pm.			
							Place this data, for CPO, into an Excel spreadsheet & determine best method to total it throughout the year, providing percentages and totals with the provided numbers.			
20000121	Wenger, Teresa	MSFC	9/29/2000	Closed	12/15/2000	None	RC	Small		
Avoidance of Running Job 3 w/Wrong T&A		This past pay period the technical team's processing step for loading the T&A flat files was missed - causing Job 3 to be rerun during the day following when it should have been completed. The ending result in this situation was a 2 hour delay at the end of the day, then back on schedule. However, it may have been much worse, had there not been a difference in holidays between the past and current T&A data.					Coordination has taken place this week with SESAAS and our DBA on a potential remedy for this. The proposed solution is as follows:			
		The job that missed being submitted does the following: (1) Refreshes file 229 in the Production database - NPS2-PAY-TADATA, (2) Copies each Center's transient storage T&A dataset to a permanent dataset with an Agency high-level qualifier, (3) Loads each T&A dataset into the NPS2-PAY-TADATA file with a CPO unique module, (4) If the load and copy are successful, deletes the transient storage datasets.					(1) Refresh file 229 - NPS2-PAY-TADATA file as a final step in Job CA00006 - Payroll Initialization, as SESAAS confirms it is not used at any other time than Job 3.			
							(2) Add a step to the very beginning of Job CA00003 - before the backup is even begun. This step is - create (with DBA's assistance) a module that will read the NPS2-PAY-TADATA file, looking for at least one record for each of the ten Centers. If it does not find a record for each Center, it will send a Return Code back to the JCL that will cause the batch job to Abend.			
							This will be thoroughly tested and approvals requested from CPO, before implementation.

Retirement Card - Suspension & Zero Deductions	The production retirement card, printing between Jobs 4 and 6, for a CSRS employee removal - did not show all earnings correctly. This employee was placed on Suspension during 1999. The calendar year deductions and accumulated deductions for 1999 are correct, but there is no year 2000 data on the card. The calendar year deductions for 2000 should show zero, and accumulated deductions the same as 1999. (For LWOP employees who also may have zero deductions in a calendar year, the retirement cards print correctly, showing the final year amounts.)		Investigate the cause of this problem, apparently revolving around the Suspension and zero calendar year deductions. This problem may also apply to FERS employees - ensure that code is also reviewed.							
20000113	Stokes, Dianne	JSC	9/21/2000	Closed	9/29/2000	None	RC	Medium		
JSC MER-NEBA-OPT-AMT and MER-NEBA-BASIC-AMT Field Errors	A problem has been identified during JSC's running of JSC employees' local benefit statements - that has been brought up in past trouble tickets, but resolution was not found and priority was low. For some employees, MER-NEBA-OPT-AMT has a value despite the MER-NEBA-OPTION being blank - employee has no coverage. Also, for some, MER-NEBA-BASIC-AMT has a value despite the MER-NEBA-BASIC not equalling "Y" - employee has no coverage.  An NPPS 1620 has been generated - 20000093, to find a resolution to this problem and to create a tool to modify incorrect data, however I want the tool run immediately for the employees whose record is incorrect.		Create a query tool to verify the JSC employees affected by these data errors - confirm results with JSC.  Create a tool to modify the affected employees, with no coverage but with coverage dollar amounts, by clearing these dollar amounts as they should be.  Test all in CPO-TEST with JSC, perform in CPO-PROD with JSC coordination of timing of the data unload for the benefits statements.

HQ RFN328RA Module Change		HQ technicals are working on a modification to their site unique module RFN328RA, due to a request from Delores Burkhardt and Debbie Randall, HQ. HQ SR # 2000-0000452 documents this change to be made for the separation of awards into various categories. Since Consolidation, CPO has had a copy of the HQ RFN328RA run each pay period (CA0H328), producing an identical report for CPO to use in their necessary reporting for the Agency. Per CPO, their report needs to mirror the changes that HQ is making for Debbie Randall's request.					HQ will be making the code modifications - once complete, have the DBA move a copy to our AGNPPROD library for CPO-unique running. When they've completed them, we need to test and analyze the results with CPO.  If acceptable, their module will be copied from HQNPPRD1 to AGNPPROD, with the global used, changed from HQNPGLOB to BJSGLGLOB, and the module catalogued. There is no need to change JCL.			
20000111	Hood, Tarrie	MSFC	9/21/2000	Closed	10/12/2000	None	RC	Medium		
FEHBBILL Query Mod		We would like for the group health indebtedness query (FEHBBILL), be modified per the NPPS 7.9 Release. This query is run on 80-day to let us know if employees from the previous pay period are receiving any net pay. We would like for the query to include another column that will let me know the employee's preference for pre-tax of FEHB which comes from the FTAX screen. Either it is blank or an "x".					Modify query FEHBBILL in AGNPUTIL to pull the waiver indicator field, and display it on this report. This will need to be installed into production after 10/11/00.

LARC NA00423 Output Change			Langley requests their NA00423 output be sent directly to our Report Distribution System, and eliminate the creation of the LAMOV transient storage dataset. Prior use was for full Center's data - but now only used for individual employees - it will be fine to directly print.				Modify the Langley NA00423 JCL accordingly - deliver the 423 dataset to (2,RPT423,NPS) with DEST=NJELARC.			
20000107	Barkley, Lynda	MSFC	9/15/2000	Closed	11/15/2000	None	None	None		
2000 W2 Form Modifications			A 2000 W2 Xerox overly form must be created according to the IRS regulations.				Continue to maintain the 1997, 1998 & 1999 forms, but additionally have a 2000 form created with appropriate changes. Joe Bogan will be the responsible party for making these changes and testing with the PayCon team's software.			
							Changes to the front and back of the form from the 1999 details will not affect the data layout - software changes due to form changes will not be necessary.

Report 106 to ADOSS for CPO			CPO would like the NASA biweekly report 106 (Payroll Cash Awards) to be transmitted to ADOSS for archival purposes. This report is created as part of the biweekly job CA00004.				Coordinate with ADOSS personnel, to have a template and schedule built for the CPO/NASA 106 report. Modify JCL for CA00004 to transmit the report to ADOSS, continuing the hard copy printout for their balancing purposes.			
20000105	Varshney, Shashi	MSFC	9/14/2000	Closed	9/27/2000	None	RC	Small		
2001 Appropriation Code			With the change of Fiscal Year, the NASA Appropriation Code also changes. Modifications need to be made for all 10 Centers' TINSTALL records, along with the CPO/NASA record - all holding the Appropriation Code.				Use utility module INSTCPO to modify the CPO record's appropriation code (NPS2-INSTALL-TBL.INSTALL-APPROP-1) FROM '8000112' TO '8001112'. Update the ten individual Centers via the online TINSTALL screen to '8001112'. All should be changed the evening of September 27, 2000, following payroll initialization.

JCL Fix for 202 Report	During testing of NPPS Release 7.9, an error was encountered with the file size of a temporary work file in the 202 report run. The Work File 5 allocation was (50,10) cylinders - it errored when Center totals were run. This error likely occurred due to the ever increasing size of history data that must be read and sorted, rather than any reference to 7.9 changes.		Modify the JCL for Job CA00004 and CA00202 under NASA to change the SPACE allocations to (CYL,(100,20),RLSE).							
20000103	Kirby, Pam	LaRC	9/7/2000	Closed	10/4/2000	None	RC	Small		
Langley 310 to ADOSS	Coordinate the archival of Langley 310 (Overtime) reports in ADOSS.		Have ADOSS template built, provide security for Langley Payroll, modify JCL for FTP transmission to ADOSS and email to appropriate personnel. Reserve current 310 reports for transmittal to ADOSS as soon as template is built - all future reports will go automatically as soon as implemented in Production.

MSFC CFC Data Extract		MSFC needs an extract of data from CNPPS to update the MSFC CFC Access database. This will be similar to the request from last year (referenced 1620), with the same file format: First Name, Middle Initial, Last Name, SSN and DOB. However, the Headquarters IG Office personnel will also be pulled from CNPPS, along with all active MSFC employees, and included on the extract file. These personnel can be pulled from Center 1000 with a duty station of 011730089.					Rename query TRWCFC to AGPCFC for configuration purposes. Modify this query to extract both MSFC employees and HQ IG employees. Transmit the file in ASCII format.			
20000099	Wenger, Teresa	MSFC	8/28/2000	Closed	8/30/2000	None	RC	Small		
Headcount Queries		This is to document the code and procedures used to meet CPO requests for "Headcount query" data, often done each quarter. This query, TWHEADCT in AGNPINQ1, will provide a report for each Center listing all employees who have had no Life Insurance deductions made for a given pay period. A FEGLI Coding Scheme matrix provided by CPO is used to ensure all Insurance options and FEGLI codes are accounted for.					Upon request from CPO, the query is run once for each Center with the provided PPE date. Ten reports are then provided to CPO. (If a Center has no one "not having deductions", a blank report stating this is provided.

Mod DA01 CA7 Query		Please modify the biweekly run Stennis query, DA01, to include specific Organization assignments for noted employees, other than what NPPS holds. This is a Stennis-specific reporting requirement - the employees will be displayed on the report with their NPPS-assigned Center, but also listed under another Center. This list will be provided as an attachment, listing SSN and Organization code to also be displayed with.					Modify query DA01 to check for these SSNs and when found, to list their name/information a second time with the specified Org Code.			
							Reload to CA7, to continue biweekly automatic runs.			
20000097	Wenger, Teresa	MSFC	8/7/2000	Closed	11/30/2000	None	RC	Medium		
Combine W2 Letter Code		Currently the modules for creating the W2 Address Letters each Fall, are too numerous and repetitive. There have been separate program modules for each Center which are only slightly different from one another. This code should be combined so that only one program module is needed, with a unique map module for each Center. DECIDE statements will handle the differences between Centers and the use of correct maps.					Modify and combine the W2 Address Letter code to have one module in AGNPUTIL, titled AGPMAIL. There may be unique map modules for each Center - ex. MSMMAIL for MSFC, DFMMAIL for DFRC, etc. These map modules are updated each Fall with appropriate mail codes and messages from the Centers' payroll/personnel offices. The W2 Address Letters are encouraged for all Centers and are created and distributed by early November each year.			
							Modify all Center CAW2LTR JCL accordingly for program module name.			
							Modify UOG Appendix C with accurate CAW2LTR module name information.

SSA Tape Balancing	During the 1999 Year End reconciliation process for balancing the Report 418 and Report 518 to the SSA Tape (CA00022) it was discovered to be out of balance with the Record Count, Earnings and FIT totals . To confirm the totals a CPO Site Unique Query was written to provide the list of individuals not included on the SSA Tape. The information provided from the query allowed the Reports and SSA Tape to balance. The problem reflected by the query are individuals whom did not have a 6 character number in the AWARD-CASE-NMBR field are not being included in the totals.		The CPO office has begun a Quarterly balancing process for the Calendar Year 2000. Included with this process will be running the CPO Site Unique module (AGAWDCS) which will scan the database and provide a listing of individuals who do not reflect 6 characters in the AWARD-CASE-NMBR field. After verification another CPO Site Unique tool (AGAWDCF) will be used to programmatically adjust each individuals record to a 6 character number. These case numbers are part of a key and can not be modified online in NPPS. This process will be done until the core CA00022 (NAB6040) job has been modified. The functional process of entering awards has been reviewed and users have been notified to please use 6 character case numbers until this change is implemented. This will reduce necessary data modifications. (CPO Site Uniques are located in DB123 - AGNPUTIL library and DB129.)							
20000089	Wenger, Teresa	MSFC	7/19/2000	Closed	7/21/2000	None	DR	Small		
GSFC Unload Failure	The GSXXUNLD unload job for GSFC, which unloads 19 core database files to them 3 times each pay period, failed at 12:20am 7/19/00. The point of failure was during the unload of file 226, PAYHIST-TWO. The failure initially appeared to be a space problem on the transient storage, but was later confirmed to be a problem due to too many secondary allocations having to be made.		<p>Modify the JCL dataset cylinder allocations of this unload as follows:</p> <p>File 225 - from (350,25) to (650,45)  File 226 - from (350,25) to (650,45)  File 232 - from (350,25) to (550,35)</p> <p>Have the corrected JCL reloaded to the CA7 automatic scheduler.</p>

CSRS Conversions on Retirement Cards			Currently on the CSRS Retirement Cards, when an employee converted to FERS, this card is continuing to print the calendar year deductions and the accumulated salary columns for the years after the conversion took place. Also, "Convert to FERS" repeats for each year in the Remarks column.				There should be nothing on the CSRS Retirement Card following the year of conversion to FERS, for those employees who have done so. Remove the repetitive Remarks statement, and cease the deduction and salary listings.			
20000085	Davis, Jacky	MSFC	7/17/2000	Closed	9/29/2000	None	RC	Medium		
New NPPS/AdminSTAR Refresh			The current AdminSTAR biweekly job, CA00027, run immediately after Job CA00004, is not extracting the correct employees. There are two problems: (1) the timing of the job, (2) the criteria for extracting the employees' data.				As a workaround, copy and modify, in the CNPPS environment, the following modules: (A) NEBAS01 & NEBAS01A: These should extract ALL active learners (duty-status NE 'z' on PER-MASTER). (B) RLB27QRY: Should extract ALL employees with a duty-status of 'Z' and a separation date (NPS2-PAY-MASTER.PAY-TERM-DATE that falls within a given range - 3 years for initial run, 28 days for all subsequent weekly runs. (C) NEBAS08: Should extract all Orgs from the NPS2-ORG-TBL. The first run should be for 3 years prior, in (B), in coordination with MSFC AdminSTAR Personnel. Thereafter, this new CA00027 (creating & transmitting reports and dataset names as it currently does) needs to run each Thursday after 6pm. Another CNPPS 1620 will request these modules be modified to run for all 10 Centers, outside the NPPS BJS - a TSO-submittable job that can be put on the CA7 Scheduler.			
			The AdminSTAR Refresh job should extract all orgs, all active employees and all employees terminated within a given past timeframe.

ADOSS Mature Reports Incomplete			The first line of each page of the 358 & 359 reports is truncating following a comma on that line. The data truncated is available within the wording following that first line, however not as readily available. This has been happening since the mature reports began transmitting to ADOSS.				It has been discovered that a File Transfer Process problem is causing this truncation. It can be remedied by an additional clause placed on the FTP step in the JCL transmitting these mature reports.			
							The first line of this FTP step should be as follows: FTP EXEC PGM=FTP,PARM=( TRANSLATE ADOSS' REGION=2048K			
							This needs to be modified in all ADOSSNE2 JCL members for the ten Centers.

20000065	Wenger, Teresa	MSFC	6/2/2000	Withdrawn	1/16/2001	None	RC	Medium		
Transmit 10 TSP Files			Beginning October 1, 2000, we need to send the TSP Board 10 individual files for the Centers, rather than one consolidated file as done currently. While a request for core to be modified is being worked, we need to be prepared with a workaround for sending the files as requested, if the core change is not done by the 7.9 release.							
			We can create a non-consolidated CA00314 job that will not duplicate the reports created in CA00004, but will create the uniquely named GDG TSP dataset for each Center. (We will leave the consolidated TSP dataset creation just as it is in CA00004 as a verification method.) The non-con CA00314 will be added to the CABWAJ4 jobstream, to allow it to be automatically run with that submission the night following Job CA00004's completion. A new PROC will be created, to be executed by NAPROD4, that will transmit the 10 files to TSP/NFC. Transmission testing should be done ASAP with TSP/NFC when the dataset names they request us to use, are given to us. This will all need to be ready for operational use by the end of September, 2000, to coincide with the 7.9 Production installation. {When the change to core is released, a 1620 regarding JCL changes needed in Job 4 at that time, and the removal of CA00314 from CABWAJ4, will be created at that time.}

Job 4 Backup	<p>In order to save time on "Job 4 night", we have used a DASD backup in Job 4 since moving from 4 days to 3 days of processing. The DASD backup took 1 hr., while the silo tape backup to 1.5 hrs. Following all processing on these evenings, we run another job that moves the DASD backup off to tape, which runs without impacting NPPS processing.</p> <p>Just recently however, a new VSM (virtual tape management) system was put into place - 5/14/00. The application backups now run in 1 hr., to tape. We no longer need to utilize the DASD backup.</p>		<p>Modify the job CA00004 JCL, to run a silo tape backup, rather than the DASD backup.</p> <p>Modify the PayCon technical processing notes, to remove the step on "Job 4 nights" which copied the DASD backup to tape, then deleted it.</p> <p>(Work will then be able to begin, with DBA and NACC, to have these no longer necessary volumes of DASD used for resizing DB123 - YEAREND - which must be made bigger by October 2000.)</p>							
20000061	Walker, Sabrina	MSFC	5/12/2000	Closed	3/16/2001	None	RC	Medium		
2000 Data on Retirement Cards - CTL-DATE Issue	<p>When Retirement Cards are created in the normal process each pay period - created/printed between Jobs 4 and 6 - for all employees who are retiring that pay period, they print correctly in showing the employees' prior years and the YTD info for 2000. However, if a retiring employee's Retirement Card is requested for printing following Job 6 (Initialization) of the pay period in which they retired - the 2000 YTD information is not displayed. No line showing any data for 2000 is written. {A Retirement Card requested for any employee who has not yet retired, will correctly show 2000 data before or after Initialization.}</p>		<p>Determine and correct the cause for this. The Cards are seldom requested after Initialization, however when needed, they should print correctly.</p>

ADOSSAJ5 to CA7		The CPO technical team has been manually running a TSO job for over 6 months, that transmits all Job 5 and all 200 MER reports to ADOSS the morning after Jobs 4, 5 and CABWAJ4s are run. It has been on a routine schedule for us to submit this job around 8:30 each "Wednesday" morning. A TSO job this routine should be placed on the CA7 Automatic Scheduler. This will eliminate another manual step and keep processing consistent.					Place the JCL in the Schedule Master PDS of JCL for use with CA7. Coordinate with CA7 personnel to set the ADOSSAJ5 job to CA7 at 8:30am each Wednesday of pay processing week. Remove it from the list of technical processing steps.

JCL error with GDG FTP		Changes were recently completed on the JSC NE00002 job (and all Centers' NE00002s) to make the 358 and 359 reports Generation Data Groups (GDGs) for safety in transmitting all to ADOSS for CPO. A unique step in the JSC NE00002 is to transmit, within the same job, the report 358 to the JSC archive server, via FTP. (The other mature reports for all Centers are FTP'd to ADOSS, for CPO, in separate/later jobs.) It was discovered that the FTP step in the JSC NE00002 was not transmitting successfully anymore, due to the GDG specification. For all steps in this jobstream, except the FTP, the 358 created must be referred to as generation (+1) - when it is created, copied, and printed. But the FTP step must refer to it as (0) to correctly get the dataset desired.					Modify the JSC NE00002 JCL to change the FTP step to refer to the NE358 dataset as (0), rather than (+1).

Quarterly CPO BJS Jobstream	CPO will be doing balancing work each Quarter, and so has requested a list of quarterly reports to be recreated for PPE 3/11/00. In doing this work, we have discussed with CPO the option of creating a single-submit Quarterly jobstream for CPO which will create all their necessary reports when they run it during the final pay period of each quarter.		<p>Create a new BJS jobstream - CAQTR01 - to run/create all needed quarterly reports. Some are not normally created during the production biweekly processing, others (111, 408, 415, 418, 518) are already created during jobs 4 &amp; 5. Within this CAQTR01 jobstream, aid the specific quarterly-processing Personnel by printing their own copies of the needed reports - to the Class D printer in Bldg. 4201 - in one bundle. The CAQTR01 jobstream will be set up similar to the job CA00005 with Natural steps and print steps, having its needed JOB, parameter defaults, and RPT information. Have Natural steps to create reports 116, 419 and 427L (last page only). Have a single print step to send these 3 report datasets along with the datasets which were created the night before for 111, 408STA, 408CTY, 415FIT, 415HIT, 415FIC, 418L and 518L.</p> <p>Add this CAQTR01 Jobstream to the UOG, Appendix C.</p>

EE Tax Exempt Check - Core Workaround		Due to late requirements information from OPM, core Employee Express jobs will not be ready to process the new option of changing tax filing status to Exempt - effective 4/15/00. Until this is in place in core, targeted for year-end, a workaround can be done to read the daily incoming EE file and flag those employees filing tax exempt. A workaround for the biweekly outgoing file is also needed.					An existing Cpo-unique module EEFINCHK, which reads the EE daily incoming file and validates financial institution routing numbers can be modified to do this additional check. The modified module will be renamed to AGECHK to reflect its multiple use. The EE transaction file will be now also searched for transactions of '0032' and filing status of 'X' for Exempt. The output report should be modified/improved with headers and clarity for the routing number checks and the tax filing checks.			
							For the biweekly extract file sent back to OPM, a running list will be kept of those changing to Exempt via EE, and their record will be manually modified on the EE dataset before transmission - to change the 'E' from NPPS to the 'X' that OPM will expect.

Zeros in MER-NEBA-OPTION			During software release testing, it was discovered that the MER-NEBA-OPTION field for numerous employees at MSFC, GSFC, JSC and KSC contain zeros, which are invalid for this particular field. The zeros have existed at least since consolidation for these Centers, and have caused no problems in the past, other than manual clearing from the field on the screen when NEBA changes made for these employees. However, with Release 7.6, these zeros will cause problems for NEBA calculations.				The zeros in the NPS2-MER-FILE.MER-NEBA-OPTION field need to be removed for Centers MSFC, GSFC, JSC, and KSC. A tool should be created to look for this field containing "0" for these Centers, then it should remove the "0". Coordinated testing and implementation should be done, validating the accuracy of the tool.			
							This data correction needs to be done prior to the first payroll run of code 7.6, on March 27, 2000.			
20000041	Wenger, Teresa	MSFC	3/13/2000	Closed	4/11/2000	None	RC	Small		
1999 YearEnd Closeout			Final steps need to be taken once CPO is finished with all of their YearEnd work - typically in March. Based on past experience and prior 1620s, there are several actions that need to take place.				* The database needs to have its final "1999 YearEnd Adjustments" backup taken. * All critical "NPPSYE" YearEnd datasets should be renamed to NPPS99 for historical purposes. * A full 201 transaction report for the Agency (can be consolidated as ONLY CPO will view this) needs to be created for the period of adjustments (from December 20, 1999 through final closeout). This report needs to be placed in ADOSS and an Excel spreadsheet should be created from it, for CPO's use. (Reference CNPPS 1620 99000082) Use CPO Unique code AGB201PP in the YEAREND database, but modified to look only for dates after 12/19/00 - as those transactions were normal, pay period transactions. {PPE 12/18/99 data, with a code modification to capture prior to 12/20/99, may be recreated/used by CPO to eliminate the hard copy retention of PPE 12/18/99 reports.} (Ref. CNPPS 1620s 20000034 & 20000036)

MSFC CA7 Job MSPR2PER			Please add an additional MSFC Personnel job to the automatic scheduler, CA7. The JCL member is MSPR2PER and should run on "Wednesdays" of Payroll week, at 3:00pm CT.				Please ensure member MSPR2PER in MSAOH.NPPSPP.SCHED.MASTER.CA7 is correctly set up for CA7 running. Send appropriate forms and work testing with Craig Saile, NACC CA7 operations. Work with him on any testing required.			
							Update the CA7 schedule in-house and on the Web, to include MSPR2PER on Wednesdays of Payweeks at 3pm CT. Monitor this job, in the future, as with other CA7 jobs.

SSC Hours Paid Query			We would like a query/spreadsheet for Leave Year 1999 totals by SSC employee for time and attendance reported hours. We need, by employee, a list for each of the following data elements - for pay periods ending 19990116 thru 20000101: Regular Hours (Base minus Annual Leave, Sick Leave, Comp Time Used, Holiday, "other leave", COP, Restored Lv, Credit Used), Overtime, Night Dif, Sunday Dif, Comp Time Earned, Credit Earned, Holiday Worked, Annual Lv, Sick Lv, Comp Time Used, Holiday Lv, Continuation of Pay (COP), Restored Annual Lv, LWOP and "Other Leave". Other Leave should include - Military Lv, Excused Lv, Admin Lv, Court Lv, Graduate Lv, Jury and Home Leave.				Provide this data by pay period for each employee, with a total for each employee on these fields for the Leave Year 1999.			
							The data is required for the Stennis Deputy CFO.

Modify CA00027 Output			Due to the volume of print for the RPT27 & RPT28 reports in CA00027, we would like to have the reports kept in Generation Data Groups for 10 pay periods, instead. The printing will not be needed.				Created GDG bases with 10 generations for AGAOH.NPPSPP.ADMSTAR.RPT27 and ..RPT28 datasets. Modify the JCL in CA00027 to remove the print step of these reports, and to create a new "generation", rather than a new "dataset" on their Natural step.			
							The UOG will not require modification.			
20000037	Burrows, Becky	MSFC	3/3/2000	Closed	5/11/2000	None	RC	Small		
New 1099 Forms Software			For 1998 and 1999, NASA 1099s were created with formatted data from NPPS and imported to PerFORM PRO software. PerFORM PRO is being replaced with a new application, Informed FORMS.				The 1099 process should be reviewed to determine all necessary changes to the 1099 code and processing steps, due to the new software to be used for 2000. The required format will change.			
							UOG changes will be incorporated under CNPPS 1620 20000015, which is currently being worked.

20000036	Wenger, Teresa	MSFC	3/2/2000	Closed	3/10/2000	None	RC	Small			
"Pay Period" 201s in ADOSS			As an addendum to CNPPS 1620 20000034, this CCR will document a more efficient method of archiving the "pay period" 201 report in ADOSS. The referenced 1620 stated that this modified 201 would be run during Job 4, as a consolidated report, then placed into ADOSS. In notifying the Centers of various reports upcoming availability in ADOSS, it was realized that we could not allow the Centers to view the consolidated report. To allow them secure access, this report must be run non-consolidated.				(1) Remove the "pay period" 201 from Job CA00004. There will no longer be any 201 transaction report within Job 4. (2) Have Ray Winkler establish templates in ADOSS for Center "201 Transaction Report"s - ex. "10 201", "21 201", etc. The "CPO 201 will no longer be the pay period reports, for future. (3) Add a Natural step at the beginning of the CABWAJ4, non-consolidated jobstream, to run the AGB201PP module, creating the "pay period" 201 report. Then FTP the dataset to ADOSS under a name of AGAOH.NPPSxx.Cnnnn.NA201. The last step in the CABWAJ4 will be to schedule the other reports - 200, 303, 513, 514. (4) Modify the BJSJOB datasets to include the Parm Program NAO201P with a default of "2", change the "Parameter Data Required" option to "Y" - thus requiring CPO Techs to enter the PPE date when running the CABWAJ4. Also change the CA00303 category sequence number to "33" to make it run prior to the 200s - a timing issue at night with ADOSS auto-extracts. (5) Modify the BJSRPT datasets to include a line for the "201" report in job CABWAJ4 - this will give it a banner, if needed for use from TSO. (6) Correct UOG, Appendix C.				
20000035	Lee, Julia	MSFC	2/25/2000	Closed	3/2/2000	None	RC	Small			
Biweekly MSFC 309 Report			We need to run the 309 (OT/CT Credit Hr) report biweekly for MSFC. Currently it is only available by running under NASA, and choosing 6200.				Please add option NA00309 for MSFC, to print to Class D in 4201. Then add the NA00309 to the CABWMS4 job so that it will run automatically each pay period with other reports under this one Submit.				
							Also, please recreate the 309 for PPE 2/12/00, during other, already-planned, data restores.

"Pay Period" 201 Report		In an effort to archive data rather than store boxes of hard copies, the daily 201 transaction reports have been considered for placing into ADOSS. Currently the 201 from "Job 4" day is transmitted to ADOSS. It was considered to put each daily 201 to ADOSS, but the number of reports would be over 300 times 10. The idea of a single 201 for the Centers, capturing all transactions for the full pay period was presented - we would like this to be done.					Create a 201 report which will capture all transactions for the full pay period. It should still sort as the daily one did, by PB and SSN, per its parameters. This 201 should be run within Job 4, and placed into ADOSS. When that begins, the daily hard copies (which should continue), can then be discarded as soon as they are reviewed/used by CPO. Please recreate this "pay period" 201 report for each pay period from 1/1/00 to current. Leave the 201 within Job 6 as a security measure that no one has turned off data locks and modified data following Job 4.			
							Update the UOG, Appendix C, to reflect the CPO Unique code that will now be run in Job 4.			
20000033	Harvey, Carol	JSC	2/17/2000	Closed	3/2/2000	None	RC	Small		
JSC Hazard Pay Indicator		An error was recently discovered regarding JSC's data in NPPS. Apparently when JSC converted to the NPPS application, an "A" was placed in the Hazard Pay Indicator for every employee. There are a limited number of JSC employees (approximately 53) who should, in fact, have the indicator set to "A".					Coordinate tests with JSC and CPO, then implement in Production immediately following a payroll initialization. Create an ad-hoc program to delete the PAY-HAZARD-RATE-CODE for all employees on the NPS2-PAY-MASTER at Center '7200' who have a Duty Status not equal to "Z". Following the running of this ad-hoc program, CPO will re-enter the Hazard Pay Indicator for the approximately 53 employees who actually need it.

CCR #	Initiator	Installation	Initiation Date	Status	Status Date	Priority	Type	Size	Expected Release	Expected Release Date
Title			Description	Recommended Action						
20000032	Pizzarelle, Jim	HQ	2/16/2000	Closed	2/22/2000	None	RC	Small	Recreate the 303 reports for PPE 1/1/00 using common default dates of "19990102". The Sick and Holiday days and value come straight from the 303. The Annual Leave should be the Annual and Restored Leave values on the 303. The Other Leave covered by 5 U.S.C. 6301 is the combination of the following values from the 303: ADM LV, CT, CT:REL, COP, COURT LV, CREDIT, EXC LV, GRD LV, HOME LV, JURY LV, MIL LV, TIM OFF. The Annual Lump Sum Payment values must be found by running a query created by K. Johnson - LUMPSU1.  Gather all data and create a file with a spreadsheet for each Center, compiling all values.	
Agency Leave/Cost Data for OPM		Each NASA Center has been requested by OPM to complete a worksheet on Leave Year 1999 Work Years and Personnel Costs. OPM requests that MSFC gather this data for each of the Centers, this year as a validation, future years as the primary source. Most of the data is accurately displayed on the NPPS 303 report.								
20000031	Elliott, Ona	MSFC	2/18/2000	Closed	3/7/2000	None	RC	Medium	Add the CA00303 to the CABWAJ4 CPO runstream that is run each pay period by CPO technicals following Job 4. The CA00303 is already set to send the dataset to ADOSS - no "ADOSS" work is needed other than give a "heads-up" to Ray Winkler of the additional datasets he'll receive on the night of "Job 4". These reports are single pages and will not impact the amount of server space used. Verify the default job parameters are set the same as MSFC's. Remove the CA00303 from the MSFC CABWMS4 jobstream. Recreate all 303 Center reports from PPE 1/1/00 through current time, via database restores. Send those to ADOSS, in addition to past 303s from LVYE 1998 and FYE 1998 and FYE 1999 to ADOSS for archival storage. Remove from NAPROD.	
Agency 303 Reports to ADOSS Biweekly		We have received numerous requests from Centers in the past few months for reprints of old 303 reports - several which needed to be recreated via database restores. Additionally, OPM is beginning to request leave data, most of which is on this report, from MSFC for Agency data gathering. It would be beneficial in the long run to have the 303s run each pay period and archived in ADOSS.

CCR #	Initiator	Installation	Initiation Date	Status	Status Date	Priority	Type	Size	Expected Release	Expected Release Date
Title	Description		Recommended Action							
20000030	Wenger, Teresa	MSFC	2/21/2000	Closed	2/22/2000	Low	DR	Small		
Biweekly EE Transmission Error		Probably since the initiation of Bond data in Employee Express (with the exception of the first "full dump" of employee data), the additional bond fields in the Biweekly EE dataset have not been forwarded to OPM. The core code has worked fine, a dataset is created 2400 characters in length. A CPO unique module (EEHASH) is run following the CAEE002 which checks the Hash Counts on the dataset. Another CPO unique module (EEFIXEX) is then run to correct the Hash Counts to what they need to be. This is done by reading the dataset and writing to a new one. The error has occurred here - EEFIXEX was not upgraded to read a 2400 character file - it has only been reading and writing 560 characters. The final copy of the file is what was being FTP'd to OPM - in error.					To initially take care of the problem, a new "full dump" dataset of employee data will be created and transmitted to OPM. This will be done using core tool NPTL0030, in a modified CAEE002 job.			
							To avoid future problems, the biweekly EE process will be changed. The unique code EEFIXEX will be removed as a step in the biweekly process. Its purpose may be reached equally well by a manual update to the dataset, without the risk and without unique code to maintain. Rather than modifying the code EEFIXEX with the correct Hash Counts, the dataset (copy made in CAEE002 with 2400 characters) will be manually corrected. This file will then be FTP'd to OPM.			
20000029	Terrelonge, Jennifer	DFRC	2/14/2000	Closed	2/18/2000	None	RC	Small		
EEB1 Report to DFRC		We need the Daily Employee Express report EEB1 to print to U2935 at DFRC. Two copies are needed, one for Payroll and one for Personnel.					Ensure the EEB1 prints successfully at DFRC. It should have been delivered since 10/99.

20000026	Wenger, Teresa	MSFC	2/1/2000	Closed	2/10/2000	None	DR	Small		
201B Report Header	The referenced 1999 1620 had requested that an appropriate header be placed on the 201B report - which reflects the CPO unique "201B" rather than core "201". That 1620 was closed, however it's now been noted that the report does not, in fact, print the 201B requested header if it contains data - which is most of the time. The code that was modified within the AGB201 module corrected the report header for any time there is no data - it will then show "201B". However, when there is data, the report shows a header of "201".		Modify the AGB201 or appropriate Called modules to let the CA0020B job running the AGB201, reflect the appropriate header of "201B". Current analysis shows that this may involve modifying the core module NCC201, rather than creating about 25 CPO Unique modules for only this one purpose. If necessary, the NCC201 would be modified to include one additional "IF" statement to catch the 201B report and give it the correct report header. If deemed necessary, this will need to be reflected in the UOG Appendix C as a core module that must be modified if released again from SESAAS. A new section will be added in the Appendix C to list any such modules.							
20000025	Barkley, Lynda	MSFC	1/31/2000	Closed	4/26/2001	None	S/A	Medium		
Analysis of W2s to ADOSS	CPO has requested that the possibility be investigated of having W2s, with the form overlay, archived on ADOSS. The newest version of ADOSS does allow more features now in regards to forms combined with data files. The goal would be to send all W2s for 1997, 1998 and 1999 to ADOSS for permanent storage. If feasible, this would allow us to discontinue sending hard copy duplicate W2s to each Center. Instead the Center payroll offices could be given access to the W2s for their Center in ADOSS, for use when reprints are needed.		Work with the ADOSS Administrator in analyzing the options and feasibility of placing W2 forms and data on ADOSS.

Glenn FYE Comp Time Data	We need data from report 311R - Regular Comp Time - at Fiscal yearend. The specific information needed is how much comp time earned was there for FY 1999.		Create a query for the amount of comp time earned for Fiscal Year 1999, from the payroll history files.							
20000021	Wenger, Teresa	MSFC	1/25/2000	Closed	4/26/2001	None	S/A	Medium		
State Tax Codes for Awards	There are numerous questions and concerns surrounding Cash Awards and State Tax Codes associated with them. Codes can be entered on the CASHPAY screen regardless if State is on the TEMPRID core table. When done, it causes no failures, but puts messages in the BJS Log for the 518 report and totals "state wages" on the 419 report. An initial thought/approach was to remove the State Tax Codes for those states with no taxes withheld. However further discussions have raised numerous questions that need to be carefully considered. Perform a study/analysis on this issue with CPO and SESAAS, as needed - have meetings to openly discuss all areas surrounding this topic and their impacts.		Current unresolved questions are: When should State Tax Code be entered? For which types of awards and gov/non-gov employees? Should they be entered for info-only purposes on W2 despite no state tax withheld - (some states want to know all income given to their residents)? The 518 report (cash awards) has messages when "no state tax code" on the core table - but the 427 does not have similar messages for 1099s/royalty awards. Consider that "state tax" totals are carried through on the 419 report - W2 Checklist - used for Yearend balancing. A query TRWAWDCK has been created & testing done to programmatically modify award state tax codes with TRWAWDFX - however they can be modified on-line through MASSCASH/CASHPAY. Consider best method to modify, as needed, and effects of this on report 118. If a Mod is done to an award online - an actual new record is added to the Awards File to record it, which then appears on the 118. Enter state tax codes for those states not on the core table that do withhold? Consider implications of HIT & OASDI withholding in regards to whether a state tax code is listed/type of award.

Mature Reports 358/359 to ADOSS		CPO currently recieves a hard-copy print of each Center's mature reports, 358 and 359. They retain these reports for a significant period of time and eventually send them off for storage - but must keep boxes and boxes of them. A better method of archival would be to utilize ADOSS and to send the 358 and 359 reports there as Centers mature.					Create applications within ADOSS for the 358 and 359 reports for each Center. Modify the NE00002 JCL to transmit each 358 and 359 report created to ADOSS. The hard copies to CPO will continue for their immediate use, however those hard copies may be shredded when finished processing each pay period. Email should be added for Ray Winkler, ADOSS Administrator to notify him each time the reports are sent, so he'll ensure they are extracted properly to ADOSS. Should also check into the capability of giving the Centers with access to ADOSS, security to their own Mature reports.			
20000019	Clemons, Mike	MSFC	1/25/2000	Withdrawn	2/23/2000	None	RC	Small		
Job 3 201B Report to ADOSS		In order to keep a more complete archive of biweekly pay period changes and to reduce the amount of hard copies kept in the CPO, we would like to the have the 201B report from Job 3 transmitted to ADOSS each pay period. This report is the 201 transaction report, excluding all Batch transactions. This report records all changes made the day of Job 3's processing - all modifications made just before payroll begins for the pay period.					Have an 'application' setup within ADOSS, for CPO viewing only, for the NASA 201B reports for each pay period. Modify the Job 3 JCL to send the 201B report to ADOSS, in addition to the hard copy print. This will allow CPO personnel to immediately view the data they need, but then be allowed to discard the paper as it will be archived in ADOSS for future use.

NPPS Email Conflicts		When multiple NPPS jobs containing email messages are run at the same time, by the same person - conflicts are often happening, preventing all email messages to be sent. This has happened quite often on the evening of payroll processing when all ten Center L&E creation jobs are run which each contain email messages for the individual Centers. If two jobs try to send an email through the JCL at the same time, one will fail. These emails are very critical notifications to the Centers that they may proceed with printing their L&Es the following day.					Work with NACC personnel to test various options in the email JCL. Brad Smith and Chris Gibbs have some ideas for us to test with them, that involve SMTP batch job changes. Attempt to find a permanent more favorable solution that will allow multiple jobs to run at the same time, by same user, sending emails. If not possible, the other option is to ensure that only one of these L&E jobs runs at a time - by either running the jobs slower during the evening they're scheduled, ensuring one finishes before manually starting another, or to modify the JCL load process and Job Names in the NPPS BJS so they are all identical. These would be a solution for the L&E situation only.			
20000017	Wenger, Teresa	MSFC	1/24/2000	Closed	11/30/2000	None	RC	Medium		
FOMF File Retrieval		MSFC would like to receive a copy of the Financial Organization Master Files from the Treasury at Hyattsville, MD. Glenn Research Center currently receives a copy, but CPO would be able to use one to stay current with all new/active Financial Institutions and their Routing Numbers. Ensuring we have all valid Routing Numbers will lower the risk for payroll processing problems.					Develop a secure method via existing NDM access to Hyattsville, to receive the monthly FOMF file. Then work with CPO to determine best manner of utilizing this data. Example, have all newly added Financial Institutions added via NPPS 1620s to the core Tables.

NPPS Banner Modules NPO0000		At the time of consolidation, the startup banner modules NPO0000 were modified within each Database to reflect the environment as a safety measure for users. When entering Production, users see a flash of "ALERT PRODUCTION ALERT PRODUCTION". "Production" is replaced with "TEST", "IFMP", "DEV" or "YEAREND" for the different databases. When the YEAREND database was recently brought up to current configuration, we had all Production modules copied to Yearend. This caused the NPO0000 banner module to flash at the Yearend Users that they were in "Production". The module was modified to accurately reflect the environment, but documentation/configuration needs to be recorded.					Document within the UOG Appendix C, the modifications to the NPO0000 banner module for reflecting each of the environments within NAPROD. A paragraph should state what is done for each database. A note should also be kept with Yearend Processing that if/when software is completely overlaid in the YearEnd database, this module must be watched.			
20000015	Wenger, Teresa	MSFC	1/24/2000	Closed	4/25/2003	None	RC	Medium		
CNPPS YearEnd Procedures and UOG		The Appendix C of the NPPS User Operations Guide (UOG) needs to have details added to it concerning the CPO YearEnd processing. Specifics need to be given on unique jobs and tools available and how/when used. Also, procedures need to be improved and made more inclusive of all steps done at YearEnd, how they're done and explanations of "why's". These procedures will be internal to the CNPPS team, the UOG information is for all NPPS Users.					Update the UOG Appendix C and internal YearEnd procedures as completely as possible.

JSC EE Dual Print	With Health Open Season over, JSC does not need to continue getting a copy of the EEB1 Daily Employee Express transactions report. Please remove JSC until November - copies would be utilized from November through January only.		Modify the JCL for the Daily EE job to comment out the JSC dual print step - make notation to use only for Nov-Jan.							
20000013	Wenger, Teresa	MSFC	1/14/2000	Closed	1/18/2000	None	RC	Small		
Emails to CPO	With recent changes of Personnel within the CPO office, the emails automatically generated during Payroll Processing need to be modified to be delivered to all appropriate people. Modify Jobs 3, 4, 5 and 6 to send emails to the following: Ona Elliott, Shashi Varshney, Mike Clemons, Sandy Seymour. The emails to technical support stay as they are.		Modify JCL for 3,4,5,6 as stated above.

Glenn NA00424 Addition			Glenn realized following Leave Year-End initialization that we do, in fact, need the 424 Yearend Leave Report. Please run this report for us, where data prior to initialization is available, and add the NA00424 option to our BJS.				Add the NA00424 to Glenn's BJS, with print destination of MVSLERC1 - xerox printer. Create the BJS - JCL, JOB, RPT - for Glenn's NA00424 in Prodn and Test. Printer destination should be MVSLERC1, Class A. Run NA00424 for Glenn from CPO-TEST where the data currently is just prior to Leave Yearend Initialization (Job 14). Add this job to Glenn in the NPPS on-request spreadsheet for tracking purposes.			
20000011	Wenger, Teresa	MSFC	1/10/2000	Closed	1/19/2000	Low	RC	Small		
Leave Year 2000 Defaults			Now that Leave Year 1999 has processed, the following jobs should have their defaults changed in the BJS for 2000: CA00014 (nasa), CA00423 & CA00424 (noncon). Langley had their 423/424 report defaults modified per 20000008, need to update other Centers as follows: The NA00423 for ARC, GSFC, HQ, GRC & SSC. The NA00424 for DFRC, HQ & GRC. Some Centers left year default blank - those will stay as-is.				Modify the BJSJOB data according to above information.

20000010	Kirby, Pam	LaRC	1/10/2000	Closed	1/21/2000	None	RC	Small	Add an IEBGENER step to copy the AGAOH.NPPSPP.C2300.NA423 dataset that is created, to the LAMOV dataset requested. Lines also need to be added to the ALLOC step to delete old version of the LAMOV dataset.	
LARC NAQR423 New Step			Need a JCL step added to the Langley NAQR423 Job in order to send to the internal report distribution system. An LAMOV.NPPSPP.NA423 dataset should be created.							
20000009	Wenger, Teresa	MSFC	1/2/2000	Closed	1/20/2000	None	RC	Small	Modify module EEFINCHK in Production, DB129, where this workaround tool exists. Change the READ-IF statement to check for the 4 correct transaction codes listed above. The JCL for CAEE014 which runs this module, is unaffected.	
EEFINCHK Update			The CPO Unique tool currently used as a workaround awaiting NPPS 1620 99000083's implementation needs to be modified. This tool checks the incoming Employee Express datasets for any financial institution transactions, then verifies if the institution number given is valid. Previously the transaction codes being looked for were "0061" and "0063". Per CPO, the codes being checked should actually be as follows: "0051, "0052", "0061" and "0062".

Glenn NE00010 Print	The NE00010 job (In Lieu of SF50 Letters) for Glenn prints to a small Laser printer. With the volume of its use for ACI processing, we'd like to have this job print to a higher-volume Xerox printer. Portrait printing, which this job requires, is not normally done on the MVSLERC1 Xerox printer.		Modify core job NE00010 for Glenn, to send in portrait mode to the Xerox printer. This is the only job which needs to permanently go there in this manner. After testing, it was found that the best method of printing in portrait mode, is to send to Class O, DEST MVSLERC1, Form name P801. This flags the Glenn Operators for Portrait mode. Created TSO member for portrait reprinting ease - AGAOH.NPPSPP.CPO.LERC.BJSJCL(CLSOPORT)

20000006	Brewer, Becky	MSFC	1/10/2000	Closed	1/14/2000	None	RC	Small	Create CPO Tool CAYE118 - modified core CA00118 report which can be run for specific dates per CPO requests.	
CPO Unique 118 Tool			For YearEnd processing, the 118 Awards report is used, however its core process is cumbersome, as it pulls ALL history data. For balancing and analysis work in YearEnd, the 118 is most useful if a specific date can be given.							
20000005	Wenger, Teresa	MSFC	1/5/2000	Closed	1/14/2000	None	RC	Small	Modify all NE00002 jobs except for SSC & DFRC, to comment out the 'normal' CPO dual print steps and send the 358 & 359 reports to Class D, writer SN97 instead.  For the MSFC NE00002, also modify the 'normal' print to the Personnel Laser printer to Class D, writer SN97.  For KSC, switch the Personnel reports destination from Laser printer (KSC,R014) to KSC-Xerox printer. Comment out the Payroll copy to R176 - they will use the Personnel copy.	
ACI Mature Report Destinations		During annual ACI processing in January, the volume of printing of mature reports increases significantly. With all ten Centers' mature reports dual printing inside the CPO office on Laser printers, the destinations must be modified. Also, KSC and MSFC use small Laser printers and have a similar problem. The alternate printing should be set for the first morning of ACI processing until the time that each Center has completed during that pay period.

20000004	Wenger, Teresa	MSFC	1/10/2000	Closed	1/14/2000	None	RC	Small		
CPO Unique 427 for YearEnd	CPO Technicals have used a module named JHW427 - a modified core NAB427 - for past yearend processing of 1099 documents. This module needs to be updated to reflect core release 7.4 which created a "0" totals page for the 427 report. This page is required for Yearend processing and must be produced from this job - the core NAB427 is not actually run in YEAREND due to the additional unique needs for 1099s.		<p>This module should be renamed to AGB427 to be consistent with other CPO Uniques. A unique batch job should be created in the YEAREND database for this module, rather than using the existing CA00427. Create a CAYE427 which will run this unique process. The JCL for this is different from core as it utilizes additional work files and names.</p> <p>Modify module AGB427 in accordance with 7.4 release of NAB427 to produce the "0" totals pages. See notes in folders for exact lines.</p>							
20000003	Wenger, Teresa	MSFC	1/7/2000	Closed	7/26/2000	None	RC	Small		
SF50 Reprinting	<p>There is a sporadic problem with the "Reprint Last Set" option in NPPS that apparently has always existed from conversations we've had with all Centers. Prior to the changes in the SF50 processing for multiple types of printers, it was simple for the technical team to "reprint" the last dataset created by the job. However, the new style of printing to a specified printer required more extensive JCL and many temporary datasets were used. The SF50 dataset could be resent successfully to an Impact printer, but not to a Laser or Xerox printer. The temporary datasets were needed for formatting purposes. To aid in resolving reprint problems (until/unless a core fix is made) the temp datasets could be made permanent for TSO reprinting.</p>		In the NE0SF50 JCL, modify the temporary datasets for Xerox printing to be permanent datasets.

Emergency Release - NAB6010		Due to a problem in Production processing of Leave Year End job CA00014, a code fix for module NAB6010 was necessary. This modified code was release from SESAAS, tested also in CNPPS and should be installed into Production ASAP. A separate job to run this module alone, through BJS, is necessary.					When code is received - install to all Databases, except YEAREND and IFMP.  To run in Production, create a new (temporary) job - CA06010, which will run this single step from the CA00014 job. Load JCL, JOB and RPT information. Follow the running of this module with a job CA00009 to recalculate normals.			
20000001	Wenger, Teresa	MSFC	1/5/2000	Closed	4/18/2002	None	RC	Small		
Add On-Request Reports		Per the Centers' requests/requirements - add the following as BJS options:  For Goddard - the NA00303 Report.  For Headquarters - the NA00424 Report.					Add the appropriate JOB and RPT information to the BJS. Create JCL members for each, with the requested printer destinations.
